

# THE BLAIRMORE ENTERPRISE

VOL. XIII, NO. 45.

BLAIRMORE, ALBERTA, THURSDAY, NOVEMBER 9, 1922.

\$2.00 YEARLY

## PASS CONSTABLE TRANSFERS

Constable Moriarty has proved himself to be a capable and faithful official of the Alberta Provincial police force. The best wishes of all go with him to his new post.

The many friends of Constable Michael Moriarty, who has been stationed in this district for a number of years, regret to learn of his being transferred from Bellevue to Coal-night's train for Edmonton, where he is put.

Since coming to The Pass, he has been a constant help to the community.

## C. S. E. T. BOYS' CONDUCT SHARE SELLING CAMPAIGN

Organization is headed by Earl Newcombe, of Calgary—Boys in 120 Communities or Towns Will Co-operate.

The Tuxes and Drill Blazers boys of Alberta are busily engaged in raising the share of the budget of the Boys' Work Board of Alberta which is allocated to them by means of a Share Selling Campaign. The shares are twenty-five cents each and sufficient of these have been issued to raise the sum of \$3,000.00 throughout the province.

The Share Selling Campaign is conducted under the direction of the Older Boys' Parliament and Earl Newcombe, of Calgary, who holds the portfolio of Minister of Finance, is responsible for and has organized the campaign throughout the province which will continue until the 15th of November.

Most enthusiastic reports of the progress of the campaign are being received from many points. Rev. J. T. Specian, formerly boys' work secretary of the Calgary Y.M.C.A., who is now minister of the Presbyterian church at Nordegg, writes: "All shares go and ten more books. Hope all points are as enthusiastic."

The National Boys' Work Board has issued an "Achievement Award" in the form of a bronze medal which will be presented to every boy who does his share in carrying the campaign through to success. From the indications up to the present it seems as though practically every Trail Ranger and Tuxis boy would qualify for this award.

The appreciation of the Finance Committee of the Board was expressed at the annual meeting last week in connection with the offer of the boys to meet the deficit on the work of the Board during the past year as well as to raise their share of the 1922-23 budget. The boys appreciate the support which has been given to the C. S. E. T. movement by the Boys' Work Board of Alberta and are anxious to do their share to insure the continuance of the work.

## L. O. M. E. DANCE

A dance will be given at the local opera house tomorrow (Friday) night under the auspices of Crow's Nest Chapter, L.O.M.E., proceeds of which will go to the Blairmore War Memorial Fund.

Leithbridge is to have a government liquor vendity. Why not one for this district as well.

## WEAR A POPPY SATURDAY

Armistice Day will be Saturday next, November the 11th, and that is "Poppy Day" as well. You will on that day purchase and wear a Flanders Poppy in honor of the great event of November the 11th, 1918. The proceeds from the sale of these poppies will go to a worthy war fund, so be on hand to help this fund and to honor Armistice Day by wearing a Flanders poppy.

Remember, also, to observe the two minutes of silence on Saturday, just before noon, when the wheels of all industries and all people of the Empire will remain in a state of respect for those who made the great sacrifice.

Also, remember to turn out on Sunday afternoon to take part in the proceedings of that day. At three p.m., a procession will form from the school grounds in the following order:

Bellevue Veterans' Band.  
Veterans' Firing Squad.  
Honor Roll Flag.

War widows and ladies with wreaths.  
School children and teachers.  
War Veterans.

Mayor and Council.  
L.O.M.E. and Red Cross.  
General Public.  
P.A.M. Band.

The day's proceedings will be under the direction of the mayor and council. The parade will be in charge of Capt. J. Angus McDonald and W. J. Fisher, and Pte. J. Rudd.

The Catholic cemetery will first be visited, where wreaths will be laid upon graves of soldiers, hymns will be sung and a short address will be delivered by Rev. Father P. J. N. Cosman. Next, the general Protestant cemetery will be visited and after the decoration of graves an address will be delivered by Rev. W. T. Young.

All citizens are asked to turn out and take part in these services. It is particularly requested that no autos be permitted to join in the procession.

## BOARD OF TRADE AFFILIATES WITH TOURIST ASSOCIATION

At a well attended meeting of the Blairmore Board of Trade, held at the Cosmopolitan hotel on Thursday evening last, it was decided to affiliate with the Tourist Association of South-Eastern British Columbia and Alberta.

The meeting was addressed by Mr. J. Fred Spalding, of Fernie, who is secretary of the Fernie Board of Trade and an executive member of the above named association. Mr. Spalding was listened to with great interest. He dealt at considerable length with the importance of Blairmore on the map of the new Banff-Windermere-Crows' Nest Pass circle tour. He stated that of all the large centres on that tour Blairmore was about the only one up to the present had not become affiliated. Blairmore, as Mr. Spalding pointed out, had very much to gain from tourist traffic, being particularly blessed with fine hotels, restaurants, garages, stores and scenery. He urged upon the Board the importance of having a tourist camp, and the Board in return assured Mr. Spalding that Blairmore would have "the best" tourist camp along the line next season.

Some of the chief points mentioned by Mr. Spalding in connection with the Banff-Windermere road were that though this road crosses the two chief ranges of the Rocky Mountains, the first time through the Sinclair Pass at an elevation of 4000 feet above sea level, and the second through the Vermilion Pass at an elevation of 5376 feet, yet only in the one case of a few hundred feet does the grade exceed 6.2 feet in the mile. There are many beautiful tangents, level as a billiard board, especially along the Kootenay river. Another feature was the prevalence of game of all sorts, the park being a real sanctu-

on which occasion the Governor-General, the lieutenant-governors of the western provinces and the governors of all the western States will be present.

The number of tourist cars to pass through this district last year is given at about four thousand, mostly from Western States points. With the opening of the new Banff-Windermere road next year it is expected that the number of tourist cars to pass through here will reach the grand total of ten thousand. This is something to look forward to and any organizations that will co-operate towards bringing such to pass deserves every support.

The affiliation fee amounts to \$250, which will cover a large amount of advertising and literature which will be required.

This new route will be opened officially on Dominion Day next year, be distributed by the association and the Associated Boards of Trade. In addition to this amount, the local executive will require several hundreds of dollars to cover cost of erecting road mileage signs and laying out of a camp site, and the committee, Messrs. W. R. and W. A. Henderson will call upon the business people for sub-

scriptions for these purposes within the next few days. And it should be remembered that this appeal should not be confined to the business portion of our population. All who have money invested in the town hope to grow up with the town and must, directly or indirectly, benefit from tourist traffic.

## THE LATE MRS. E. J. PUTNAM

The following is copied from a recent issue of the *Truro Weekly News*: "Mrs. Elizabeth Jane Putnam, widow of the late Captain William Putnam, formerly of Maitland, died suddenly of heart failure at the residence of her sister, Mrs. George Murray, at Economy, on Saturday, October 28th, at 10 p.m., leaving to mourn three daughters and one son. Funeral at Maitland on November 1st."

The late Mrs. Putnam was mother of our local barrister, Mr. L. H. Putnam, and had passed the allotted age of three-score years and ten.

The West Canadian is adding a large warehouse to the rear of their new store building next to Upton's tailor shop.

## MEN'S WEAR

# Rheumatism

## It kills pain!

Most cases of rheumatism arise from congestion. Apply Sloan's. Don't rub. It penetrates the sore spot, starting the blood circulating. This reduces painful congestion—the inflammation vanishes.

Try Sloan on sprained, bruised muscles, on aching back and aches. Try it on that "cold in the chest."

Made in Canada

**Sloan's Liniment—kills pain!**

It kills pain! by breaking up congestion

The bunk-house was clean in a great way, manchester way.

"Secure in my quarters, I assumed command at once, and inside of ten minutes had the men well in hand. Dr. Randall had had me have the men set up a tent for me and my patient, and it was not long before this was done. Moving the patient was not so easy a task—I suppose it hurt his dignity to be carried on a cot; but finally this too was accomplished.

"Whenever as I am, I had never before slept outside, and the first night in the tent was not strictly enjoyable. My patient was restless and feverish, so I was up several times, and each time I went back to my side of the curtain it was harder to go to sleep than the time before. And when I got up in the morning a gutter-snake was curled neatly under my bed! I threw a boot at it, and as I watched it wriggle away I pined for home and mother.

"For the two weeks I was at the ranch I never had a woman, except once when Mrs. Randall came out with the doctor. But the cowboys were a compensation: it was lovely to see them filling over each other to do things for me, and Don was a tower of strength in himself. Mr. Bingham says that he is still jealous of Don.

"For the first few days Jack was a model patient. Then he had a shave, and at once he became a really cross. It was no name for the way he behaved. He had never been ill a day in his life, and the enforced quiet told on his nerves, I suppose; and then, too, his leg had been so long unset before the doctor reached him that there was considerable inflammation, so he had a great deal of pain. You may think that he is quiet and amenable to unnecessary speech, but I can assure you that at times his vocabulary is anything but unimpassioned.

"At the end of two weeks Dr. Randall decided that the men could in future do all that was necessary for my patient, so I went back to Carleton City. I thought at that time that I never wanted to see that ranch again.

"You changed your mind?" I suggested, fearful that I was not going to hear the end of the story.

"No, I didn't," Mr. Bingham changed it for me, Mrs. Bingham replied.

"No," I replied. "Please tell me I hope I am not inquisitive, but I do love 'true' stories just as much as Sunny does."

"It is a wonder that Mary did not mention it," Mrs. Bingham began. "She never forgets to remind me of the fact that I broke all my solemn vows and married a patient."

"Seven years ago this summer I was visiting Dr. and Mrs. Randall in Carleton City, when one day a call came for the doctor to go out to see a man who had been badly hurt while breaking a young horse. The doctor was away all night, and when he came back he told Mrs. Randall and me what he had found—a man with a leg broken in two places, a dislocated shoulder, and bruised from head to foot. That man was Mr. Bingham. The doctor knew him slightly and so did Mrs. Randall, and they were plainly worried to think that he could not possibly receive proper attention. So in a fit of temporary aberration I volunteered to go out to the ranch and nurse him! There was not another nurse closer than Medicine Hat, and the doctor, manlike, jumped at my offer, in spite of the objections of his wife. Before I had time to change my mind he had 'phoned to the hotel and told Don Livingstone to call for me on his way home. Don had come in with the doctor for some greatly needed sickroom supplies; I had not met him before, but he had innumerable directions and some warnings, and hurried off to another case, leaving me to pack my suitcase in fear and trembling.

"It had retained any illusions regarding my profession, I should have not then immediately upon seeing my patient and his surroundings. The surroundings were—worse for—worse for the fact that Jack's distinguished countenance was more or less obscured by a three days' growth of beard, he looked quite safe and harmless. But he and Don lived in the bunk-house with the men, and the place was hot and untidy, and stuffy with stale tobacco-smoke—imagine a sick man in such a sick-room!" I must confess that I have been in many worse houses lots of time, houses where several servants were kept, for

## Men With Tails Reported to Have Been Found in Indo-China

Reports that a tribe of people who have tails is living in Indo-China, have brought Captain R. A. Salisbury, world famous explorer, scientist and author, to the Far East. He will have Japan shortly for Southern China and then he will explore inland with the intention of finding the new-reported tailless anthropologists. Captain Salisbury is the first man to attempt a systematic search and the result of his investigation is being eagerly awaited. Captain Salisbury will go from Indo-China to Europe by way of the Suez Canal. He will tour Abyssinia on the way and has been invited to be the guest of the King of Abyssinia.

# Mine Burning Since 1884

## In Ohio, Says Geologists

Geologists and miners estimate that \$50,000,000 worth of bluish-gray coal has been burned in the subterranean cellars of Perry County, Ohio, where the venedians started a fire during the coal strike of 1884.

The blaze, which has been eating its way through the unmined stocks of Ohio fuel, is raging again at the mouth of an abandoned shaft near Shawnee. The furnace burles its tongues of flame a hundred feet into the air and can be seen for miles.

At other places in the hills the fire has broken through the surface stratum and shoots as high as the surrounding freetops.

At the present rate geologists estimate it will take fifteen years for the fire to exhaust its acreage.

Chasms large enough to hold two-story houses have been opened by the blaze in the New Straitsville district. Great fissures scar the earth's surface all along the three-mile line of the fire.

For heat and smoke, residents of this district might be living on the slopes of Vesuvius. After each rain, clouds of smoke rise from the cracks in the earth and smoke constantly pours out over the land.

On one farm near New Straitsville water is at the steaming point when drawn from the well because of the intense underground heat.

World

Leaving aside for the moment the political and economic aspects of the new development in the railroad world of Canada, there is a touch of romance in the situation as it now presents itself. Two of the longest railroads in the world, stretching across a continent from ocean to ocean, serving the same people and interests, and governed by similar conditions of commerce, are to bid for the public's business. One is privately owned and paying, the other nationally owned and with heavy deficits to be wiped out. At the head of the former is one of the keenest railway minds in the world. And to the head of the latter has just been appointed one of the ablest railway executives.

Sir Henry Thornton comes with a record of generalship in railway management second to none in the empire. Mr. Beatty is a man who is skilled in transportation strategy and a worthy rival of the Anglo-American knight. Mr. Beatty has a big head. Sir Henry Thornton knows it, and is coming prepared. Surely a battle of giants! On whose side will the Canadian people ally themselves? They "own" the national lines, which Sir Henry Thornton is to direct. But the other great system is part of them, too. Its history is very much their own. Whichever way the contest goes, it will form one of the most interesting business duels in the country's development.—Ottawa Citizen.

# Photographs By Radio

## It may soon be possible to send photographs by radio to all parts of the world.

In England a radio company has been conducting experiments and photographs have been received by radio. The invention is still in the experimental stage. The pictures which have been received by General Radio Company were wireless direct on to a specially made sensitive celluloid film, which was afterwards developed.

# Dye Old Dress Or Drapery In Diamond Dyes

Buy "Diamond Dyes" and follow the simple directions. In every package, past water whether you can dye or not, successfully, because perfect home dyeing is guaranteed with Diamond Dyes even if you have never dyed before. Worn, faded dresses, skirts, waists, coats, sweaters, stockings, draperies, hangings, everything become like—new again. Just tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton, or mixed goods. Diamond Dyes never streak, spot, fade, or run.

# Electric Heating In Ontario

## Electric heating has become so popular that fuses have blown out in transformer stations, owing to the heavy load.

The experts say that electric heating generally is economically impossible, but it is saving thousands of homes right now from being ice-houses. From the Mall and Empire.

## Children Cry for Fletcher's

Fletcher's Castoria is strictly a remedy for Infants and Children. Foods are specially prepared for babies. A baby's medicine is even more essential for Baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

## What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrup. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food, giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.

## GENUINE CASTORIA ALWAYS

Bears the Signature of

In Use For Over 30 Years

THE CENTAUR COMPANY, NEW YORK CITY

## Measuring Depth of Fog

Instrument Used by London-Paris Air Service

The Paris-London air service has an ingenious instrument for measuring the depth of fog above the starting place at Croydon or Abbeville, and so to determine whether there is clear, dry weather a few hundred feet up. The instrument, which is based on the property of human hair of contracting sharply on passing from wet to dry air, consists of a hair attached to a trigger that holds a ring. The instrument is sent aloft with toy balloons on a string; as soon as it reaches dry air the hair contracts, pulls the trigger, and down comes the ring on the string.

## HOW'S THIS?

HALL'S CATARRH MEDICINE will do what we claim for it—rid your system of Catarrh of the Urinary Tract, or of Catarrh of the Lungs, or of Catarrh of the Throat. We do not recommend it for any other ailment.

HALL'S CATARRH MEDICINE is a blood-purifying, cathartic, and astringent. It cleanses the blood, purifies the mucous surfaces of the system, thus removing the cause of Catarrh and restoring health in restoring health.

All Druggists. Circulars free. F. J. Cheney & Co., Toledo, Ohio.

## Special Crop of Apples

During the year that closed on June 1, the Wenatchee Valley in the State of Washington shipped sixteen thousand cartons of apples, or one apple for almost every inhabitant of the world. It is reckoned that the yield this year will be one-tenth less. The prosperity of the Wenatchee apple district under its system of co-operative effort should be an example to other communities that are adapted by soil and climate to produce a special crop.

## SPARKLING EYES

Follow Good Health

London, Ont.—"I have taken Dr. Pierce's Favorite Prescription and it has proved a beneficial tonic. After having tried many other remedies, I was in a very weak and 'condition' condition, could not regain my strength, so I decided to take the 'Favorite Prescription' and by the time I had taken one bottle I was completely restored to health and strength. Dr. Pierce's Favorite Prescription can be relied upon as a builder and strengthening tonic."—Mrs. John Shuler, 225 Clarence St.

IF YOU'RE A YOUNG WOMAN OR EVEN IN MIDDLE LIFE Here is Some Good Advice for You From a Prominent Woman

London, Ont.—"When I reached middle age I was in very poor health, was rundown, nervous, would have fainting spells and head aches. I was a physical wreck. I tried many different medicines but the only medicine that gave me any relief was Dr. Pierce's Favorite Prescription. Before I had taken a half bottle I was feeling like a different person—the more I took the stronger I got. What 'Favorite Prescription' did for me I am sure it will do for other women at this critical period of life if they will give it a fair trial."—Mrs. M. M. Taylor, 489 Hill St.

Better to cure your neighborhood drug store and obtain Dr. Pierce's Favorite Prescription in tablet or liquid form. Write Dr. Pierce's Invalids' Dept., Buffalo, N. Y., for free medical advice, or send the trial pkg. of tablets to Dr. Pierce's Laboratory in Bridgeport, Ont.

## To Care For Tubercular Women

Saskatchewan Council of Women Will Help to Raise Fund of \$50,000

All the women of Saskatchewan, in whatever part of the province, are invited to lend a hand in raising a fund of \$50,000 for taking care of 50 tubercular women belonging to the province. The Provincial Council of Women has decided to make an effort to raise this sum each year to help along the work of the Sanatorium.

A. B. Cook, Managing Director of the Sanatorium, addressed a meeting of the Provincial Council of Women, telling of the huge programme ahead of the Saskatchewan Anti-Tuberculosis League. It is to get a Sanatorium built at Saskatoon, and one at Regina within the next two or three years, in addition to the magnificent amount of health work that is being done at the Sanatorium at Fort Qu'Appelle.

He asked if the P.C.W. thought it likely the women of Saskatchewan had sufficient sympathy with the tubercular, to make them willing to try to get money enough together to pay for the constant care of fifty women who have tuberculosis.

The Provincial Council of Women believed that the ladies of the province would be proud to have the chance to care for fifty mothers who have not money enough to get treatment for themselves. So Mr. Cook was promised that the P.C.W. will try to make the need known, and that it how the \$50,000 fund for Fifty Mothers is starting.

Every woman and every woman's club, or Sunday school class, or organization is invited to help with it. Mrs. F. W. Bates, 2085 Assiniboine St., Regina, is the P.C.W. Treasurer of the fund. Prompt acknowledgment will be sent to everyone who sends to her even the sum of a dollar for this fund; or if donations are sent direct to Mr. Cook at the Sanatorium, Fort Qu'Appelle, for the fund for Fifty Mothers, a receipt will be mailed at once to the sender.

## HOW TO REGAIN YOUR GOOD HEALTH

It Can Be Done Through Keeping the Blood Supply Rich and Pure

There is not a nook or corner in Canada, in the cities, the towns, the villages, on the farms and in the mines and lumber camps, where Dr. Williams' Pink Pills have not been used, and from one end of the country to the other kind words have been said for this medicine.

You have only to ask your neighbors, and they can tell you of some rheumatic or nerve-shattered man, some suffering woman, ailing youth or anemic girl who has been benefited by Dr. Williams' Pink Pills. For more than a third of a century these pills have been known not only in Canada, but throughout the world as a reliable tonic, blood-enriching medicine.

The success of Dr. Williams' Pink Pills is due to the fact that they go to the root of the disease in the blood, and by making the vital fluid rich, they strengthen the organs and nerves of the body. Mr. A. M. Large, Victoria, B.C., adds his testimony to that of thousands of others who have found benefit through the use of this medicine. He says:—"About three years ago I became dreadfully run-down. So much so that I had to stop work altogether, and being a carpenter and busily engaged, the outlook was gloomy. I became so reduced that I would have to rest even after a short walk. My appetite almost completely failed. The doctor whom I consulted told me I would have to take a prolonged rest, and gave me a bottle of medicine, which, however, did not help me. Then a good friend urged me to try Dr. Williams' Pink Pills, and I got a supply and before long felt an improvement. From that on I continued to gain and was able to resume my employment. I continued taking the pills for some time longer and now feel as vigorous as I ever did."

You can get these pills through any medicine dealer, or by mail at 50 cents a box or six boxes for \$2.50 from Dr. Williams' Medicine Co., Brookville, Ont.

Angler from Alabama is Winner of Trophy For 1922  
It is announced by the Canadian National Railways that Mr. C. E. Abbott, of Bessemer, Alabama, has been declared the winner of the Nipigon Trophy for the season of 1922.

This trophy is donated by the railways for annual competition by non-resident anglers, and is held by the disciple of Isaac Walton who secures the largest speckled trout in Nipigon waters with rod and line. The trout caught by Mr. Abbott was 7 pounds 9 ounces in weight, 27 inches in length, and 15 inches in girth. It was caught on a single hook, with cockroach bait.

Corn's cripple the feet and make making a torture, yet sure relief in the shape of Holloway's Corn Remover is within reach of all.

Fish Output Less  
Total value of the production of the Canadian fisheries during 1921 was \$31,931,935 as compared with \$19,241,339 for 1920 and \$56,568,479 in 1919, according to a report by the Department of Trade and Commerce. The total stated represented value of the product as marketed, whether fresh, domestically prepared or factory made.

"Even a policeman can't arrest the flight of time," said the funny man. "Oh, I don't know," replied the matter-of-fact person. "Only this morning I saw a policeman enter a side door and stop a few minutes."

Minard's Liniment For Garget in Cows

## OIL LIGHT BEATS ELECTRIC OR GAS

## BURNS 94% AIR

A new oil lamp that gives an amazingly brilliant, soft, white light, even better than gas or electricity, has been tested by the U.S. Government and is being introduced at leading universities and found to be superior to 10 ordinary oil lamps. It burns without odor, smoke or soot, and is not pumping up, is simple, clean, safe. Burns 94 per cent. air and 6 per cent. common kerosene (costs) oil.

The inventor, T. V. Johnson, 575 McDermot Ave., Winnipeg, is offering to send a lamp on 10 days' FREE trial, or even to give one FREE to the first user in each locality who will help him introduce it. Write him today for full particulars. Also ask him to explain how you can get the agency, and without experience or money make \$250 to \$500 per month.

## Student of Values

"You did not return the engagement ring when you jilted the young man?" "No," replied the heartless girl. "And he is unworthy; but it is a perfectly good ring."—Washington Star.

## PUT STOMACH IN

## ORDER AT ONCE

"Pape's Diapiesin" for Gas, Indigestion or Sour Stomach

Instantly! Stomach corrected! You never feel the slightest distress from indigestion or a sour, acid, gassy stomach, after you eat a tablet of "Pape's Diapiesin." The moment it reaches the stomach all sourness, flatulence, heartburn, gases, palpitation and pain disappear. Druggists guarantee each package to correct digestion at once. End your stomach trouble for a few cents.

## Protecting Bird Life

We have heard a good deal about the migratory birds convention. The need of an agreement between Canada and the United States for the protection of bird life could not be disputed, and, according to reports received by the commissioner of the Canadian national parks it is having most satisfactory results. Black ducks, corn-morants, gulls, terns, cranes, Canada geese, brant and plover have shown marked increases.—From the Edmonton Journal.

"We want none of that here!" cried the captain of a certain regiment, to two of his men who were about to have a fight. "We want no fighting men in this regiment!"

## WORLD HAPPENINGS BRIEFLY TOLD

Touching an electric wire carrying 2,300 volts while working on a pole at Toronto, William J. Smith, 25, died within a few minutes.

Rev. Joseph Hartman has been appointed Roman Catholic chaplain of the British Columbia penitentiary, in succession to Rev. A. Michaels, who has resigned.

The London Board of Trade states that the distribution of dyestuffs obtained from Germany under the reparations agreement is being carried out by the British Dyestuffs Corporation, 70 Spring Gardens, Manchester.

The London Times understands that the mission to negotiate the funding of the British debt will likely leave for Germany between the end of the elections and Christmas. Its personnel has not yet been decided.

A special force of customs officers has been established along the international boundary to stop smuggling, declared Hon. Jacques Bureau, Minister of Customs. "I believe we're already ahead of every confiscated article to dress the whole civil service," he added, lightly.

Every postal telegraph and cable company office in the United States will now accept messages for transmission to Great Britain by the trans-Atlantic wireless circuit conducted by the Radio Corporation of America and Marconi's Wireless Telegraph Company, Limited.

Fall plowing in Central Saskatchewan is 25 per cent. greater this season than last according to the Canadian Government crop correspondent for that part of the province. A general increase in crop acreage is indicated.

Frank O. Fowler, Mayor of Winnipeg, announced that he would not be a candidate for re-election at the approaching municipal election. Laborers are talking of running F. J. Dixon, leader of the Labor group in the Legislature, for the mayoralty.

## ROYAL YEAST CAKES RICH IN VITAMINES

MADE IN CANADA

The importance of Vitamines in food is being recognized at the present time to a greater extent than ever before. It has been conclusively demonstrated that yeast is rich in this all important element. Many people have received great benefit physically simply by taking one, two or three Royal Yeast Cakes a day. Send name and address for free copy "Royal Yeast Cakes for Better Health."

### WHY WE ARE WESTERN ENTHUSIASTS

With an estimated aggregate output of 365,045,000 bushels of wheat this year, Manitoba, Saskatchewan and Alberta have again maintained their reputation for grain production. The per acre average will probably be larger than for several years past, while in some localities bumper yields of from 30 to 60 bushels an acre are reported. In many cases large returns are being received from land which has been cropped successfully for many years without the application of artificial fertilizers, demonstrating the wonderful richness of agricultural land in Western Canada. In spite of considerable bad weather last month, harvesting operations are well forward and all crops will probably be saved in good shape. Oats, barley, rye and flax production show a large increase over last year. The yield of these cereals was also good in nearly every part of the country, and, like the wheat, are of high quality.

### SPANISH SWINDLE LETTER

The revival of the old "Prisoner Letter," one of the oldest "con" game ruses known to fraud, has been attempted and copies of the following epistle have been received by various parties throughout Alberta. Following is a copy received by our local watchmaker and jeweler, Mr. S. L. Trono, from Barcelona, Spain, and speaks for itself. This communication is being handed over to Sergt. Scott, of the A.P.P., who in conjunction with other authorities will take some steps to warn the public so as to save the infirm being victimized by the deception.

"Barcelona, 19-10-22.

"Dear Sir:  
"Being imprisoned here, bankruptcy, I beseech you to help me to obtain a sum of \$360,000 I have in America, being necessary to come here to raise the seizure of my baggage, paying to the Registrar of the Court the expense of my trial and recover my portmanteau containing a secret pocket, where I have hidden two check payable to bearer four that sum.

"As reward, I will give up to you the third part, viz: \$120,000.

"I cannot receive your answer in the prison, but you can send a cablegram to a person of my confidence who will deliver it me addressed as follows:

Jaime Serrano,

Urgel 14, Mauresa, Spain.

"Awaiting your answer to instruct you all in secret.

"Now I sing only

"D de S.

"First of all answer by cable, not by letter."

This system of fraud was prevalent in England many years ago, being operated with considerable success before the war and revived after a lapse of fifteen years or more. It is said that millions of dollars were gathered in by the alleged fake promoters when the last wave passed over England.

### HE'D ATTEND TO THAT

A Yorkshire man, who was very bow-legged, entered a tailor's shop to be measured for a pair of trousers. He selected the cloth; and the tailor proceeded to measure him. When he passed the tape down the 'bow' of the leg the man tapped him on the arm and said:

"Owd og mate! Thee mak' 'em straight. Ah'll bend 'em!"

### REV. HILLIS WRIGHT MOVES TO VANCOUVER

Rev. Hillis Wright, of Grand Forks, B. C., has been chosen minister of St. Matthew's Presbyterian church, Vancouver.

The new minister of St. Matthew's is a graduate of Manitoba College in arts and theology. He took a post-graduate course in sociology under President Patrick, of Manitoba College. He was in the Cariboo towards the end of the gold rush, and has spent some time on the prairie, having been in charge of a church at Pincher Creek, Alberta, for some years. At present he is a convener of the Home Mission committee for the Kootenay Presbytery.

Rev. Mr. Wright is well-known to Blaimore people, having on a number of occasions officiated at the Union church here.

### TOO MANY LITTLE PEOPLE WANT TO BE BIG PEOPLE

People who are sensitive about things should not buy on credit.

The seller is as much entitled to ask for payment, when payment is due, as the buyer is to ask for credit when the purchase is made.

There is too much credit in this country.

It is too easy to "charge it." Too many persons of small means are trying to live like persons of large means by owing the difference.

Too many little businesses are trying to expand into big businesses by borrowing capital.

There are too many little people who want to be big people with borrowed capital—Dallas (Texas) News.

### A POOR MAN'S COURT

An interesting experiment is to be made this fall in New York when the Austin on Society of America opens its "poor man's court." The society is expected to relieve the higher courts of a continually increasing burden of litigation, to reach decisions in ordinary civil cases with none of the delay and little expense of court proceedings, and thereby to minister directly to the promotion of justice and good feeling in the community.

The proposed court cannot, of course, touch criminal or divorce cases, and it does not tend to encourage litigants to bring trade disputes before it. But any persons may take their disputes or disagreements to the court. Those who do seek help may either choose an arbitrator themselves to sit with them, or provide one. The arbitrator need not be a judge or even a lawyer; any one who is satisfactory to the parties at difference may serve. Witnesses will be called and documents presented, but legal counsel need not be retained. The elaborate rules of evidence that prevail in a court of law will not be recognized. There will be no expert testimony, and no juries. The arbitrator will have every opportunity to get at the bottom of the case without any impediments whatever.

If the litigants bring their own arbitrator, they will pay the court only a nominal sum for the use of its rooms and support of its authority. If the court provides an arbitrator, the litigants will pay his fees and expenses.

The court draws its authority from the arbitration law that the legislature of New York passed two years ago. This law made settlements by voluntary arbitration legal and binding; it gave to the arbitrators the power to summon witnesses and to conduct hearings and provided that an arbitrator's award could be enforced as if it were a decree of court.

—Youth's Companion.

### SOME PHONETICS

If an S and an I and O and a U  
With an X at the end spell Su,  
And an E and a Y and E spell eye,  
Pray what is the speller to do?  
Then also if an S and an I and a G  
And an H and E D spell side,  
There is nothing much left for the speller to do

But to go and commit sinners, sigh!

INSTITUTIONAL CHURCH

AT BELLEVUE

A SHREWD EYE TO BUSINESS

Rev. A. A. Lytle conducted the opening and dedicatory services of the new institutional church at Bellevue on Sunday. The major portion of the funds for the erection of this building have been provided by the Methodist Missionary society. It is practically fire-proof, being constructed of tile and cement and finished on the outside in stucco. The auditorium, parlors, and gymnasium are completed, but the swimming pool and game rooms have yet to be added. The building is a credit to the community and the town is justly proud of it. The people showed their appreciation by packing this immense auditorium three times up the opening day. Rev. Harry Peters, himself at one time a Welsh miner, is the official pastor in charge of the work.

—Nashua News.

"Honey," said the colored auditor, "when we gets married you ain't gwine to give up dat good job you has workin' for de white folks, is you?" "But ain't we gwine to have no honeymoon an' take a trip on de train somewhere?" "One of us might go, honey. dey ain't a thing holdin' me, but you's got 'sponsibilities."

I'd rather be a "could-be,"  
If I could not be an "are,"  
For a "could-be" is a "may-be,"  
With a chance of touching par,  
I'd rather be a "has-been,"  
Than a "might-have-been" by far,  
For a "might-have-been" has never been,  
But a "has" was once an "are."  
—Joe Burgess.

## The Bird Man

Jack Miner Tells Story of How He Makes Friends With Bird Life. Speaking recently at Edmonton, under the auspices of the Northern Alberta Fish and Game Protective Association, Jack Miner unfolded the secret that made friends with wild bird life. His address as reported in the Edmonton Bulletin, is well worth reading:

"I was born barefoot and brought up on three meals a day, oatmeal, cornmeal and miss-meal," said Mr. Miner, speaking of his youth. He corrected with pride the common mistake of sportsmen in speaking of the wild goose. "It is the Canada goose," said Mr. Miner, who told of starting in 1904 with seven wild geese which he bought, clipped their wings and kept them at his farm. The next year, the next, no geese stopped as they passed by on their way to the north in spring or the south in fall, and they had almost given up hope, when one spring in answer to the honk of their own geese a passing flock hesitated, flew around and finally came back. Next year, thirty-two came and the next year there were 400; and the following year they could not count them.

It would have been hard to believe had the pictures not shown it to be a fact that Mr. Miner walks among them easily, that they light on a pond with fifty feet of his back door and right beside the main road. The small boy of the house tried to stir the geese up by throwing stones at them, but it was hard to get them interested at all. The camera records the motions of wild geese going over and over very exceptional picture showed the geese dropping straight down from the air into the pond. They came down direct as a plummet, their wings outstretched, acting as a parachute.

It is not only the wild ducks and geese that find a warm welcome and a safe home at the Miner farm, but robins, quail and all other bird life, except maybe hawks. Mr. Miner told of thirteen little quail flying straight into Mrs. Miner's apron, of three little raccoons that happily adopted the old cat for their mother and thrived on her milk; of five little wild ducks, which they had tagged, and word had come back of the fate of every one. Delish, survived the longest. For six years she came back and back, every year raising a family. There were two broods of eight, two of nine and one of twelve and finally Delish also succumbed to the guns of the hunter.

But the story of David and Jonathan touched the heart of everyone in the audience. These two together with their flock were leaving one day when the sportsman's gun singled David and Mr. Miner had bound up the torn tendon of Jonathan's back in the pond. Jonathan had refused to leave his brother. He stayed with David and the others of the clipped wings, in spite of the fact that he was strong and able to fly. Then one night a great horned owl had come down and instead of going out of the way himself, Jonathan fought the owl defending those of the flock who were not so well protected till finally the owl had sunk his beak into the old faithful head and killed him. That night a trap was set in Jonathan's feathers and the owl was caught. "He is a perfect gentleman the Canada gander," said Mr. Miner "and has the best principles of any person I know."

But keeping "open house" to so many friends means something in the way of provisions, and the speaker told of setting forth on the guest table over 2,000 bushels of ear corn one fall in the two months that the geese were with him. They come into the back yard and feed on the chickens. They answer when he calls them and inside of a short time they have no hesitation in coming right down at his back door. It did not take them long to realize that his home was their home and that they were in sanctuary there.

**Canada May Buy Vimy Ridge**  
Speaking at the dedication of a military plot in Mount Pleasant Cemetery, London, Ont., Hon. George P. Gray, Minister of Militia, announced that Canada has for some time been conducting negotiations for the purchase of Vimy Ridge, it being the intention to maintain the famous battlefield as a park to perpetuate the memory of the Canadians who fell there.

**Do We Want Them?**  
Some 20,000 Italians and 6,000 Roumanians are coming to Canada next spring, which probably will mean more work for the Government. It is not that the Government fears the coming of these people, but that the Government is anxious to see that the Britishers who are headed toward Australia—St. Catharines Standard.

**Can Make It Talk, Cents**  
Dix—They say that money talks; can you make it?  
Dix—Sure! I can make every penny count.

W. N. U. 1444

## Princess Mary Is Model Housekeeper

Follows General Principles as Taught By Her Mother

Princess Mary, according to the court gossip, is ably carrying out the royal tradition of good housekeeping started by Queen Victoria and preserved by Queen Mary, although it was badly broken by Queen Alexandra. The Princess, it is said, is following the general principles of housekeeping she learned under her mother's tuition.

She allows a certain sum to her housekeeper for the running expenses of Chesterfield House. Once a week she holds a domestic council in her boudoir, checking up the housekeeper's books to see if any funds can be cut down or cut out.

One of Queen Mary's favorite maxims in running royal establishments is, "It is unwise to be parsimonious; it is foolish to be extravagant." And the Princess adheres to this axiom.

For instance, she is very particular that lights should not be burned in rooms not being used. In many big London mansions the main living rooms are lit from dusk to bedtime whether occupied or not. Consequently Princess Mary's lighting bills are said to be 15 per cent. less than those of other great social establishments.

She is fortunate in having a first-class housekeeper, who was the assistant at Buckingham Palace and with the Queen's permission, went with the Princess on her marriage. The Princess frequently visits her kitchen. She then follows the Queen's practice, her mother having often said to her:

"When you have a household of your own you must not neglect the kitchen. A well conducted kitchen is the basis of good housekeeping."

## Provincial Farms

Revenue for Saskatchewan Government Last Year Was \$100,000

The greatest farming organization in Saskatchewan—the Provincial Government—has harvested the largest and most evenly balanced crop in the history of its agrarian operations. At the jalls and monthly hospitals of Saskatchewan, the Department of Public Works, under Hon. A. P. McNab, has more than 5,000 acres under cultivation in addition to being in the livestock business on an extensive scale. Practically all the work on these institutional farms which are located at Regina, Moosemound, Battleford, Weyburn and Prince Albert is performed by the prisoners of the jalls and the inmates of the mental hospitals. Last year the value of the crops from the various farms brought \$100,000 to the Government's coffers, and this figure this year will be increased by a great amount.

One of the biggest problems in connection with the jalls, declares the superior of these gigantic farming operations, "is finding work for all the prisoners. Large as the farm in Regina is, it does not supply nearly enough employment for the inmates who are forced to accommodate."

One result of this work, aside from the revenue it produces is seen in the fact that the work of raising pure-bred livestock has resulted in a few of the prisoners taking up this occupation after the completion of their sentence and some have shown exceptional ability in the work.

## Celebrated Jubilee Of Cable Enterprise

Huge System Developed in Many Parts of World

Recently there were celebrated in Great Britain, in the presence of the Duke of York and a large and distinguished company, the jubilee of a group of submarine cable companies which have developed a huge and successful system of cables in many parts of the world. When the company was formed there were only eight thousand miles of cable in existence. Today there are 325,000 miles. The whole of the capital and technical skill and commercial enterprise for this great business came from Great Britain, and represented a host of technical and physical difficulties. The lead which Great Britain took in submarine telegraphy, the first successful commercial experiments in which were conducted in British waters, while the first company to work wireless communication on a business basis was also formed in Great Britain.

**Southern Alberta Crops**  
Crop reports for various sections of Southern Alberta, while differing according to locality, show some very satisfactory results. At High River a field of about 40 acres averaged 45 bushels and graded No. 1 Hard, weighing 64 pounds to the bushel.

A 4.0 of 340 acres averaged 90 bushels to the acre, which is nearer the general average of production.

## A FINE FIELD OF SUNFLOWERS

This view shows a portion of a seventeen-acre field of sunflowers on a farm near Humboldt, Sask. The crop was grown by Mr. Sam Mycock. The photo was taken on Sept. 29. A crib silo was built to store this crop.

## Novel Fishing Methods

Malay Natives Put Drug in Water to Supply Fish

The most curious method of fishing that is employed by the natives who inhabit the upper reaches of the rivers of the Malay Peninsula.

When they decide to go fishing they send messengers to the other villages down the river to warn them that the water is going to be poisoned. Then two kinds of trees are "tapped" for their sap. Although the sap are quite harmless apart, when the two are mixed with the waters of the river they become a strong stupefying drug.

This drug is thrown into the river, turning it milky white, and immediately all the fish come to the surface—doped. Cages are used to collect the fish, for in a few hours the stream has cleared and the fish have revived.

The River Tigis contains surprising numbers of huge fish, which are sought eagerly by the natives.

The ordinary methods of hook and line do not appeal to the Arab, who likes to do things in the easiest possible manner. He is not at all occasionally, but that is of little use for catching the real big fellows.

When he goes after them he proceeds to ground-bait the river with dough; not the impotent compound of flour and water used, for making bread, but a thick sticky paste into which a quantity of opium had been mixed.

Any fish that makes a meal of this is quickly stupefied and floats to the surface. The fisherman then mounts an inflated goat skin boat and goes out to collect his bag.

Things have not changed much on the Tigis in the last 3,000 years. The boats used now are identical in shape with those seen in Babylonian sculptures, and the goat skin boats have been employed in Mesopotamia for more than a hundred generations.

## Economy Was Costly

Jeweler Found Cutting Expenses Does Not Always Pay

Thinking to save money a jeweler discharged his regular salesman and hired an inexperienced boy. One day when he returned from lunch he said, "Well, Frank, did you sell anything while I was out?"

"Yes, sir," said the plain band ring.

"Fine, my boy, fine!" said the jeweler, enthusiastically. "We'll make a salesman out of you one of these days. You got the regular price for them, or cost?"

"Oh, yes, sir," the boy replied. "The price—placed on the inside was 18c and the mail took all that was left, sir."—Boston Transcript.

**Britain's Youngest Lieut-General**  
Sir Charles Harington, who at fifty is the youngest Lieutenant-General in the British Army, rose to fame in the war, which found him a junior Major in the Liverpool. After two years he was Chief of Staff to the Second Army under Lord Plumer, whom he helped to organize the attack at Messines in 1917, and then followed to Italy. The next year he became Deputy Chief of the General Staff, and in 1920 Commander of the British Army of the Black Sea.

**Maybe He Did**  
The pupils had been writing a history essay, and when the teacher was correcting the papers she was puzzled to find this remark in one of them: "King John died bad!"

On being questioned, the boy who had written this said: "Well, teacher, you said he died without heirs!"

**A Rude Suggestion**  
"Mark you never be able to drive that mule with a flatiron. For heaven's sake use your head," admonished her husband. And then he wondered why she wouldn't speak to him for the rest of the day.

## World's Crop Reports

International Institute at Rome Gives A Remarkable Service

One of the most remarkable institutions in the world is the International Institute of Agriculture which was set up in Rome before the war.

It collects from all the world, and distributes to the right persons in every country, information about every department of agriculture. It publishes crop reports and monthly reviews in English, French, Italian and Spanish.

The institute circulates invaluable information about new methods, machinery, plant diseases, animals, poultry, and insects, and sends them straight to The Family Herald and other newspaper offices.

Here we have an example of what will some day be the common practice of mankind about all good things. Every branch of human activity will be served by a world-wide publicity organization. — Montreal Family Herald.

## What Becomes of Rainfall

Greatest Amount Absorbed By Plants and Redistributed

One ton of water to three pounds of flour is nature's recipe for making wheat bread, according to figures on rainfall published by the Bureau of Soils of the Department of Agriculture.

By controlling the water supply in irrigation, accurate measurement is possible, and this estimate is of the minimum requirement. Many crops need five times as much water.

What becomes of all the water? Of a ton of water falling on a dozen square feet of soil during the year, about one-third sinks through and is drained off underground. Only a little runs off the surface if the field is well ploughed. A little evaporates immediately and the rest is held in the soil. As the surface dries, the moisture in the soil soaks up by capillary attraction and evaporates off the surface. But by far the greater amount is drunk by the roots and plants, draws up into the leaves and is breathed back in vast quantities into the atmosphere.

## Most Inaccessible Place in World

No Land Birds Or Native Animals On Easter Island

Professor MacMillan Brown has returned to Sydney, N.S.W., from Easter Island, which he says is the most inaccessible place in the world. There are no land birds or native animals, and once small grey rats were used as currency and ultimately served as nibbils for the starlings.

Professor Brown examined the hundred famous stone images in human form standing on great stone platforms, below which are chambers where are placed the bleached bones of the dead. Some of the statues are of immense size, fully 70 feet in height, and crowned by huge stone heads.

The professor believes that tens of thousands of workmen erected the monument to the people of a bygone Pacific Empire inhabiting the rim of archipelagoes of which Easter Island is the centre.

**Dairying in Saskatchewan**  
Dairying in Saskatchewan is making rapid progress according to a statement by Mr. J. G. Robertson, Livestock Commissioner for the province.

"The demand for dairy stock is so great," says Mr. Robertson, "that it cannot be filled with western-bred cattle. The department is endeavoring to meet the need, and this year 452 head of cattle, mostly eastern-bred, have been supplied."

A woman's idea of a perfect husband is one who would leave a bathroom as tidy as he found it.

## Rural Credits in Canada

Provincial Legislation Under Which Financial Assistance is Available To Agriculturists

The national growth of Canada depends upon the development of her natural resources. This is particularly the case with regard to the settlement of land and agricultural production. Coincident with this and of major importance is the question of rural credits. The prospective settler and the progressive agriculturist must of necessity be in a position where he can secure the use of funds for development, either for the establishment of a home or the extension of his farming operations, such as increasing his acreage for cropping purposes, or adding to the numbers of his livestock.

This condition has been recognized by practically every province in Canada, and legislation has been enacted providing for a system of credit of variable lengths and at reasonable interest rates.

The importance of placing this information in the hands of the agriculturist and prospective settler has induced the Natural Resources Intelligence Branch of the Department of the Interior to publish a synopsis of the rural credit legislation in Canada in pamphlet form. Copies will be supplied free on application to the above branch, or will be forwarded direct to those contemplating settling in Canada, upon receipt of address.

## Sugar Crop On Increase

More Being Grown Than For Several Years Past

There will be more sugar for everybody this year, as more is being grown than has been the case for several years past.

The latest advices show that the world's crop for the current year will yield over seventeen million tons of sugar as compared with rather more than sixteen and a half millions last year, and just over fifteen million tons the year before.

Of course, owing to the war, the European beet crop almost disappeared, but this is now gradually increasing, and the prospects of the French crop are very good indeed. Half as much again is being produced in that country this year as was produced last year.

The Cuban crop is rather less than last year, but many countries are now growing sugar in large quantities for the European market that previously sent little or nothing for their use.

The consumption of sugar has increased by leaps and bounds since the Armistice, and, although the quality grown is greater, there is an ever-increasing demand.

## Diameter Of Known Universe

No Mind Can Comprehend Vast Number of Miles

The Lowell Observatory, Harvard, has extended the observed portion of the heavens to a new cluster of fainter, farther stars which indicate that the known universe has a diameter of at least 2,300,000,000,000,000 miles.

No comparison, no analysis or resolution of the figures, can aid in comprehension. It helps not at all to say that the distance is 48,000,000,000 times the circumference of the earth; or that it is 23,000,000,000 times the distance from the earth to the moon; or that it is 23,000,000,000 times the distance from the earth to the sun.

The pace of light is the earthly maximum of speed, yet from one end to the other of this stellar system light spends 350,000 years in traveling—New York World.

Some men are too intellectual to be intelligent.

A total of 156 varieties of minerals have been discovered in Wyoming.

## Official Hog Grading

Regulations Under Which Work Will Be Undertaken Has Been Approved

The regulations under which the official grading of hogs will be undertaken have been approved by council as submitted after final agreement by all interests represented by the Joint Swine Committee. The swine graders appointed through the Civil Service Commission following the grading examinations have reported for duty to the Dominion Livestock Branch.

The Honorable W. R. Motherwell, Dominion Minister of Agriculture, announces that the hog grading regulations were made effective on October 30th, 1922. In the meantime, the new hog grading staff is being given a thorough course of instruction at the Toronto Stockyards, so that the official grading stations, as established will be uniformly applied at all stockyards and abattoirs in Canada.

Standard grading equipment is being adopted and is already installed at several stockyards where preliminary grading tests are being conducted and the necessary adjustments to expedite the grading and movement of hogs being made. Experimental work in ear-tagging for co-operative shipments providing for the identification of individual farmer's hogs is in its final stage and the Livestock Commissioner will announce an approved identification mark simultaneously with the inauguration of grading.

## Free Seed Testing

Work Has Been Undertaken By University of Saskatchewan

A forecast of the seed testing work that will be carried on this winter by the Field Husbandry Department of the University of Saskatchewan, was received by officials of the Department of Agriculture from Professor Manley Chappin.

The work will be the first of its kind in the province and will be the result of many applications received from farmers of Saskatchewan. The tests will not be "official," but the results will test agriculturists the quality of the seed they are using, whether it will grow and whether it is pure.

Seeds which will be tested include all the common field crops, wheat, oats, barley, rye, flax, sweet clover, peas, alfalfa, bromegrass and corn. The tests will be free.

While the Dominion Seed Law provides that seed-testing in germination and purity shall be done by the Dominion Government laboratories which are located at Winnipeg and Calgary, so many countries in Saskatchewan have forwarded samples to the Field Husbandry Branch of the Saskatchewan University for testing that it was decided to make germination and purity tests a permanent feature of the department.

Ten samples of seed will be tested free of charge by the department for each individual or company. If more samples are submitted by an individual, concern, a charge of 50 cents at test will be made for them.

## India Desires Self-Government

Necessary to Allay Agitation, Says Sir S. Aiyer

"India desires self-government and must have it, if the agitation and unrest in that country is to be allayed. If it is withheld it will only lead to antagonism towards, and hatred of, Great Britain will become more deeply embedded in the hearts of the native population."

In these words, Sir Sivaswamy Aiyer, leader of the National party in the legislative assembly in India, (corresponding to the House of Commons in Great Britain) who was one of the representatives of British India at the League of Nations meeting in Geneva last September, gravely expressed himself prior to his departure for Vancouver.

**Some Things Worth Knowing**  
A hard, apparently useless paint brush may be restored, to service by pounding it with a hammer, after which it should be cleaned with turpentine. Once in a while condition the brush should be allowed to stand in water.

A large sized grocery box, if painted or enamelled on the outside, can be made into a pretty and useful bookcase.

An old broom handle makes an effective curtain pole.

A fresh tip may be formed on a shoe or boot lace by dipping the end into molten wax.

A faded carpet may be largely restored to its original color by brushing with turpentine and water.

It has been asserted that spiders possess a consciousness to industrial order.

A towel hanging in feet rises two inches in passing from hand to wall.

## Items of Local Interest

Alex. Moroney told a business visit to Calgary this week.

The man who never says a foolish thing in conversation will never say a wise one.

Judge McDonald, of Nicolet, was in town a couple of days this week.

A special meeting of the Curling Club was held on Tuesday night.

The universal idea of a level-headed man is one who agrees with us.

Mr. Ringland is expected to arrive here on or about the 15th, to undertake the management of the Blainmore Arena.

Ray of Hope Rebekah Lodge will hold a grand masonic ball in the new I. O. O. F. hall at Bellevue on Friday night of next week.

The dance given at the opera house on Friday night last under the auspices of the local I. O. O. F. lodge was a most enjoyable affair and netted a net surplus.

Some of our lady friends emphatically deny that in fashionable women of today have gone to the extreme. They state that they still have garments to take off.

All who intend joining the local Curling Club are requested to hand their names to the secretary, J. B. Wilson, not later than Tuesday, November the 21st, on which date the risks for the season will be selected.

The steamer Marion, which for forty-nine years has plied the waters of Bras D'Or Lakes between Whycomogah and Sydney as a freight carrier, was burnt to the water's edge last week.

Joseph Bond, school teacher at Black Spring Ridge, Alta., and wife, made a flying visit to Blainmore to spend Thanksgiving with his mother, and with his party took in the big dinner at the Palm Cafe on Sunday evening.

Leslie A. Corkum, a Halifax grocer, was leaving his store on Tuesday night of last week, when a stranger entered and ordered him to hold up his hands. He refused and the bandit shot him through the stomach, then rifled the cash register and escaped before police could be on the scene. Corkum is still lying in hospital in a most critical condition.

The time loss due to industrial disputes was less during September than during the previous month, but greater than during September of last year.

The Soviet government of Russia is manufacturing war and using posters in Moscow to advertise it. These are among the first advertising signs to appear in Russia since the revolution.

Able discourses were delivered at both morning and evening at the new Bellevue Methodist church on Sunday last by the Rev. A. S. Tuttle, M. A., D. D., of Edmonton. On Monday evening the church was crowded to hear Rev. Dr. Tuttle in one of his popular lectures.

On a church door in Ireland this legend was to be read not long ago: "This is to give notice that no person is to be buried in this churchyard but those who are in the parish. Those who wish to be buried are desired to apply to me, Ephraim Grubb, Parish Clerk."

It now looks as though the bridge will have to spend another season in the old open risk finances for the proposed new arena, here to slow in showing up that it was found hardly possible to undertake the building this fall.

The new Crystal Rink at Coleman is fast taking on the appearance of reality and gives promise of surpassing in size and general layout any arena in the province. Blainmore, of course, will not be outdone in any enterprise for the encouragement of sport and is now suggesting the erection of a building for the accommodation of junior hockey and skating.

Sandy School Teacher—"And when the prodigal son came home, what happened, Tommy?" Tommy—"His father hurt himself."

Teacher—"Why, where did you hear that?"

Tommy—"It said that his father ran and fell on his neck. I'll bet it would hurt you to fall on your neck."

A rumor is current that the greater portion of the weight of a carload of fence posts now days is composed of alcohol in the shape of whiskey and that shipments of this character have been unloaded between Crow's Nest and Lethbridge since the Barrier was erected near Coleman. Oh, yes, the rum-running has been completely stopped (?)

## SEE YOUR DOCTOR

So reasonable is the advice given before the Ontario section of the American College of Surgeons to the effect that everyone should go to his doctor annually for an examination that it is a wonder it is not generally heeded. One reason why people who think they are in fair health shrink from a medical examination is probably fear that something will be discovered. Another is probably a suspicion that certain doctors will pretend to locate a disorder and will embark on the agreeable practice of running up a bill. The first reason, of course, is an absurd one, and the second, though it might apply to certain doctors, does not apply to the profession generally, and in all cases it is a risk well worth taking.

In recent years a great many people have learned of the advantage of a yearly or half-yearly visit to the dentist, instead of waiting until aching teeth suggest that they ought to be attended to. This periodical examination is the real painless dentistry, because cavities may be filled while they are still tiny. Still more necessary should be the annual medical examination that has been suggested. Medical men agree that the greatest obstacle to the successful treatment of cancer, is the fact that when the disease is discovered it has already made such ravages that the case is a critical one. Cancer taken in time is as curable as many other diseases which are not considered fatal, but which manifest their presence in the early stages and does not give the doctor a chance for successful treatment.

We would read less frequently of the sudden death of citizens apparently in good health and in the prime of life if they would submit themselves regularly to a competent medical examiner. Very often it is by accident that some deep seated trouble is discovered. A man has a touch of influenza, and calls a doctor whose examination may reveal the fact that he has heart disease, perhaps advanced to a stage at which cure is impossible. Moreover, a periodical examination would put the doctor in possession of general information concerning the patient's constitution and mode of living which would be of the greatest advantage to him if he were suddenly called to treat him for a serious illness. He would go to the case with data that would enable him to deal with the crisis in a much more intelligent manner than if he were treating a stranger. The people who most need the regular examination of a physician are those who are apparently in perfect health, for they are the people who never call a doctor until they are ill in bed. Ailing persons, as a rule, do not die so suddenly as the more robust, for they are less likely to be taken unaware by an illness. It has often been noted that among the persons who live to a great age are a surprising proportion who have never had real good health, and who have been constitutionally delicate. The reason is that such persons take good care of themselves, and shrink from risks that their robust brethren would think nothing of. They are always watching to ward off an illness that they know might prove fatal; whereas those in rude health do not appreciate the dangers to which they expose themselves. A regular medical examination would be likely to do as much toward the death rate as the complete abolition of almost any single disease which can be named.

tion who have never had real good health, and who have been constitutionally delicate. The reason is that such persons take good care of themselves, and shrink from risks that their robust brethren would think nothing of. They are always watching to ward off an illness that they know might prove fatal; whereas those in rude health do not appreciate the dangers to which they expose themselves. A regular medical examination would be likely to do as much toward the death rate as the complete abolition of almost any single disease which can be named.

## MODIFIED ATTITUDE TOWARD AMUSEMENT

Toronto, Oct. 16.—Canadian Methodistism is now adopting a more modified attitude toward amusement.

Years ago there was a positive command in the Methodist Discipline to the members to refrain from indulgence in cards, dancing or theatre-going. Later there was a footnote appended to the Discipline, replacing the barrier, and while leaving the matter to the individual conscience its effect was unfavorable to these amusements.

Now the church, instead of banning amusements, calls on her people to use care and discrimination to distinguish between the wheat and the chaff. One of the final acts of the General Conference was to give approval to the following findings of the committee on the state of the whole church:

"We desire to recognize the liberty of all people to a full measure in regard to all legitimate pleasures, and yet urge that in pursuing the things of passing happiness we do not let our liberty become a cause of offence to others."

"We urge our people to exercise all

care and discrimination in all their amusements.

"This is a pleasure-loving age, and our environment gets the disposition to become careless on many things which mean much to the life and welfare of the Church."

"The moving picture is a great means for education and inspiration and amusement, but here also we urge the need of closest discrimination."

"We should approach all our amusements from the standpoint of their effect upon ourselves and our influence upon others."

## ALBERTA HOSPITALS

The fourth annual report of the American College of Surgeons has been issued and contains reports on

a survey made of all hospitals in the United States and Canada of fifty beds or more. The following hospitals were put on the approved list in Alberta: Royal Alexandra, Edmonton; General Hospital, Edmonton; Misericordia Hospital, Edmonton; Galt Hospital, Lethbridge; General Hospital, Calgary; Holy Cross Hospital, Calgary; Public Hospital, Lamont; Medicine Hat Hospital, Medicine Hat. These institutions proved that they are giving the best scientific care to their patients and Alberta was congratulated on the splendid showing made in hospital work.

HIGH SCHOOL DEBATE  
ON NOVEMBER 22

The Literary Society of the Claresholm High School has made an entry in the Provincial High School Debating League and word has been received that the first debate will be on November 22 between representatives of Hillcrest and Claresholm high schools. Two debaters from Claresholm will visit Hillcrest on that date while two of the Hillcrest students will come to Claresholm, the result being determined by the total points in the two simultaneous debates. The subject of argument is: "Resolved that Chinese and Japanese immigrants should be excluded from Canada." Minor debates will be held during the next two weeks and the debaters for the above occasion will be chosen from the speakers. The place where the debate will be held will be announced later. Claresholm Review.

## SOMETHING FOR EVERYBODY

The Family Herald and Weekly Star of Montreal, seems to have a genius for collecting, or at least for giving, the best of everything. It is because all needs are catered to, and all minds receive what they need, and all households are given from the experience of the past and the wisdom of the present what is necessary for today and for tomorrow also that none can afford to be without the Family Herald and Weekly Star, particularly as the subscription price of \$2.00 a year is within the means of all.

## MAY TELEPHONE

TELEPHONES

Control of wireless telephony by the provincial governments is recommended by the executives of the telephone departments of the western provinces, including Alberta, and legislation seeking to transfer control from the federal to the provincial governments will be asked for at the coming session. The recommendation is that stations be licensed by the provincial governments and that fifty per cent. of the license fees go to the dominion government.

## INTERESTED IN ALBERTA

During the past week the official Alberta party in charge of the government exhibit shown at fairs in western states returned to Edmonton. The exhibit was in charge of C. G. Groff, chief publicity commissioner, and was accompanied by A. W. Foley and Frank Peterson. The exhibit was shown at the midland empire fair at Billings, Montana; at the state fair at Salt Lake City, Utah; and also at Twin Falls, Idaho. Officials also paid a visit to the state fair of Colorado at Pueblo. A large number of people viewed the exhibit and were given information and literature on Alberta, chiefly in connection with the irrigated lands of the Lethbridge Rural Irrigation district, which the government has undertaken to colonize. A good many prospective immigrants were interviewed.

THE PASS FOURTEEN  
YEARS AGO

(The Frank Paper, March, 1908.)  
The C. P. R. was last week fined two hundred dollars and costs for working Operator Mullen on Sunday, December 15, without allowing him twenty-four hours rest during six days, contrary to the Lord's Day Act.

The provincial government, by an order in council, has promulgated a revision of the regulations governing the bringing of civil suits in the district courts relative to small debt cases. The new regulations are designed to cheapen litigation for the benefit of the farmers.

The deferred annual meeting of the Crows' Nest Pass Coal Co. was held at Toronto last week. The report of the directors showed a balance at credit of profit and loss account, brought forward from 1906, of \$353,692. To this has been added \$882,988, the company's net profit for 1907, making the aggregate \$1,000,980. A dividend of ten per cent. has been paid. The coal mined during 1907 amounted to 981,939 tons.

The following pupils were successful at the Little school in February month: Standard IV.—A. Mousty, R. Scott, Standard III, senior—L. Watkins, Vivian Keith, Earl Keith, Standard III, junior—Harold Keith, E. Williams, Alphonse Fabro, Standard II.—E. Huguel, L. Petiot, H. Petiot, A. Huguel, A. Mousty, Beatrice Williams.

The Alberta Coal Co. are opening a new mine at Lundbreck, on the hill south of the town. The seam is one of the finest that has yet been opened in the district and promises to become the producer of the finest quality of domestic coal.

Dame rumor has it that H. L. Frank has disposed of his interest in the Canadian-American Company to the French shareholders and that S. W. Gebo, former general manager, is to return to take that position. A contract has been received for the delivery of a thousand tons of coal a day to the C. P. R.

Mud slides on the line west of Crows' Nest have caused considerable delay of trains for some days past.

E. T. Fitzsimmons, of the Great West Fuel & Trading Co., left Tuesday evening on a business trip to Regina.

Mrs. McMeekin holds her military opening next Tuesday and has an exceptionally fine display.

The provincial government has decided to discontinue the teaching of vertical writing in Alberta schools.

Harvey Murphy is wearing the smile that won't come off. It's a boy.

The members of what is known as the Blairmore Syndicate, having coal lands near Sentinel, held a meeting in Frank last week.

Fred T. Cronwell, a wealthy Alberta stockman, has become identified with a novel kind of transcontinental race. It is to be a race between two horses which are to be sent all the way from the Pacific to the Atlantic.

Secretary George Cruickshank, of the Board of Trade, is in receipt of a communication from Manager Richardson, of the Calgary dominion fair, stating that space for an exhibit from The Pass has been allotted in the main exhibition building.

James Crowder and Miss Elizabeth Derbyshire, of Coleman, were married on Saturday last, March 21st, at St. Alban's church, Rev. Webb officiating.

The girls branch of the Moral Crusade will meet at Knox church on Thursday night next.

Peter Patterson, national executive board member from District 18, has just returned from Nova Scotia, where he had great success. It is thought that the miners of the province will shortly join the United Mine Workers in a body as a result of Mr. Patterson's mission.

Manager J. H. Farmer, of the Union Bank, has been recipient this week of

ANOTHER DILLINGHAM  
STATEMENT

In the October 26th issue of the *Insular Province*, the following statement is made:

"We also know of a former policeman who came to Blairmore without ever having his name coupled with dishonesty. He left Blairmore with \$50,000 and retired in the U.S. This \$50,000 came from the boss bootleggers of The Pass."

The above statement cannot be proved by Dillingham and is a slur at the Provincial Police Force.

## MAIL ORDERS

An enterprising tradesman sent a doctor a box of cigars, which had not been ordered, with a bill for six dollars. The accompanying letter stated that "I have ventured to send these on my own initiative, being convinced that you will appreciate their exquisite flavor."

In due course the doctor replied: "You have not asked me for a consultation, but I venture to send you three prescriptions, being convinced that you will derive therefrom as much benefit as I shall derive from any such cigars. As my charge for prescriptions is two dollars, this makes as even."—The United Shield.

CANADA'S POST  
OFFICE BUSINESS

More than five hundred million letters and postcards and 250,000,000 newspapers were carried through the Canadian mails in the course of a year's business, according to figures presented by the Post Office Department to the conference of postal officials. In addition, 50,000,000 parcels and 250,000,000 circulars, etc., are handled, the statement giving approximate figures for a year's business showed, in the course of twelve months, 10,000,000 money orders and 6,000,000 postal notes are issued. There are 12,200 Post Offices operated and 2,400 mail routes.

The summary of a year's business was given to the postal officials as indicative of the place of the Post Office in the business life of the Dominion. Translated into dollars, the mail service expenditure for a year was stated to be \$15,000,000 and the annual cost of rural delivery service \$2,750,000.

Postage stamp sales in the course of a year, it was pointed out, reached the enormous total of \$28,350,000, while money order transactions entailed the changing hands of \$270,000,000. Postal note transactions totalled \$25,000,000, and there was on deposit in Post Office Savings Banks approximately \$25,000,000.

## THE PUBLISHER'S RESPONSIBILITY

More and more difficult every day is the choice of good reading—the kind that nourishes the young and refreshes the old. One way to avoid mistakes is to choose the book or periodical that stands for something—that is not overratingly supplying the sensational and silly. The Youth's Companion has always been published by men who felt a keen responsibility to their readers; and they have held steadfast to one purpose—to familiarize Companion readers with the best things in the world, and by means of original articles and stories to illustrate the truth that the practice of the old, homely virtues brings the greatest satisfaction in life. Try it for a year and see.

The 52 issues of 1923 will be crowded with serial stories, short stories, poetry, facts and fun. Subscribe now and receive:

1. The Youth's Companion—52 issues in 1923.
2. All the remaining issues of 1922.
3. The Companion Home Calendar for 1923.
4. All for \$2.50.
5. Or include McCall's Magazine, the monthly authority on fashion. Both publications, only \$3.00.

THE YOUTH'S COMPANION  
Commonwealth Ave. & St. Paul St., Boston, Mass.

Subscriptions Received at The Enterprise Office.

congratulations over the birth of a baby girl to Mrs. Farmer.

The Frank checker club cleaned up the Blairmore club on Friday evening in a session held at the Blairmore hotel. Frank won by a score of 23 to 13. Proprietor Drain gave the players a delicious spread after the game.

YOU'LL SURELY

## Sir John Willison Unfolds Details Of The National Land Settlement Scheme

Sir John Willison, President of the Western Canada Colonization Association, unfolded details of the prodigious national land settlement scheme which the association hopes to inaugurate in the near future at a meeting recently held in Toronto.

Regarding the settlement of the vast unpopulated spaces of the Dominion, Sir John gravely alluded to the stupendous task ahead, but it was necessary, he pointed out, if Canada was to achieve that measure of prosperity which was hers by right of geographic position and her increased status in the world.

"Canada needs today, as she never needed before, a large army of agricultural workers; European countries are in a position to supply the need, and it only remains for an organized force to bring these workers to the Dominion to ensure a bright era of prosperity," was the sum and substance of his peroration. It was essential, however, that care should be exercised in the selection and care of the emigrants, once they decided to leave their native shores, he declared; while it was imperative that the mistakes of the past in the shape of irresponsible land settlement should be avoided.

The increase of the population, indiscriminately was to be deplored, he thought, but the increase of the people by a carefully planned scheme, such as that he had conceived, wherein party interests, private gain, or the enrichment of a few individuals would be impossible, was eminently desirable.

The one end in view, whereby ten million persons would be brought to Canada, settled on land in close proximity to railways, supervised in their early ventures, and under which, within thirty-two years at the most, they would become proprietary farmers, would be a tremendous asset to the country, for, he stated, it would mean the building up of the provinces, lightening of provincial and national burdens and the early redemption of Dominion obligations.

All parts of the country had been consulted before the plans were brought to fruition; even the motherland, he said, had shown its practical interest by a donation of £100,000. In addition, the various provinces, including Ontario, Manitoba, Saskatchewan, Alberta, and British Columbia, had been approached, and had unhesitatingly promised. The assistance of the railways had been sought and obtained, he said, and what was now needed was the support of the individual who placed his national property before everything else.

After explaining how 20,000,000 acres of land in all parts of Canada, and situated within five to twelve miles of a railroad, were owned but unoccupied, the president asserted that it was the settlement of this amount the association had in view. To do this, the lands would be listed by the association, the immigrant would be directed to a suitable location, and within ten years or less, if circumstances permitted, the vendor would receive a fair and reasonable price for his property. Under this plan the purchaser, he was sure, would be satisfied with the transaction, while, above everything else, the pressing problem of restoring prosperity and lightening taxation would be in the course of solution.

Sir John Willison announced that Howard Everett, who has had experience in the settlement of one million acres in Western Canada, has been appointed General Manager of the Association. A controller of finance will be appointed. His duties will correspond to those of the Auditor General at Ottawa and he will be vested with power to control all expenditures, refusing payment if he considers that such payments would be extravagant. In addition an Operating Committee of seven, with headquarters at Winnipeg, will assist the General Manager. Already appointed to this committee are M. A. Brown, former Mayor of Medicine Hat; E. Field, Chief Land Commissioner, Canadian National Railways; Col. J. S. Dennis, of the C. P. Resources Department; G. F. Chipman, Editor Grain Growers' Guide; to represent the organized farmers of the west; A. E. McKenzie, of Brandon, and W. W. Evans, of Winnipeg, leaving one to be named.

A Scottish minister, attending the funeral of one of his flock, stepped up to an old woman in the crowd and said: "I didn't see you in church on Sunday, Betty." "Gude sir," she replied, "ye couldn't well, for I was there."

Another Source of Revenue The customs and excise authorities in England are going to tap another source of revenue. They have announced that royal processions, public funerals, lord mayor's shows, and other occasions are entertaining within the meaning of the act. The result will be that any person who receives money for accommodation to view such processions must pay the entertainments tax.

No Names! A little London girl was lost. And after wandering about for an hour she applied for help to a policeman, who took her to the station. When they could not find out her surname, or get any clue as to her family, though they knew the neighborhood well.

"What name does your mother call you father?" the policeman asked.

"She don't call me no name," said the girl. "She likes 'im."

"Khaki" meant, originally, a dust-colored fabric of the character of canvas drill, or holland, used by the British and native armies of India. It seems to have been first worn by the Gurdas, a mixed regiment of frontier troops, in 1848.

## An Electric Train Recorder

Ingenious Device Used By Overseas Railway

A simple and ingenious instrument for checking train movements was recently devised for an overseas railway by a British firm. A record is automatically made on a horizontal drum which is driven by a clock. A long screw in front of the drum moves a pen slowly across the paper wound over the drum, and this pen carrier is controlled by electric magnets which are operated by the train as it passes over a special contact on the track. As each train passes this point the magnet pulls the pen in one direction or another, according to the train's movement. The diagram thus gives a continuous record of the trains passing a particular point in both directions. One advantage of this instrument is that it may be placed at any convenient spot away from the track.

## Famous War Dog

Credited With Having Raised a \$9,000 War Fund in Victoria

Peter, famous war dog, although only a little Boston bull, is dead at the home of his mistress, Mrs. R. H. Dice, Los Angeles. Peter was credited with having raised a \$9,000 war fund in Victoria, B.C., during the war by sitting on a table every day for three years and "speaking for contributions."

He received a medal from the Canadian Field Comforts Association in England, a life membership in the Canadian Red Cross and four other decorations, including one from the Yukon Battalion.

After the war Peter went into the movies and gained more fame. He was nine years old when he died after a brief illness.

## Was Willing to Pay

Man Wanted to Fly From London, England, to Winnipeg

"I want a machine to take me to Winnipeg at once on urgent business," The Croydon Aerodrome authorities are entrepeneering enough; but this request from a caller beat them all.

It was pointed out that the flight would include a trip across the Atlantic, but the prospective customer said he did not mind and would pay any amount of money up to six guineas! When told that the journey would cost him considerably more than 600 guineas, he left the aerodrome with a very poor opinion of flying.

## Japan Successful As Colonist

When all is said that can be said in criticism of Japan's activities in Korea, it remains self-evident to those who make themselves acquainted with the great work she has accomplished there, that Korea is a marvellously successful experiment in Japanese colonization which will compare favorably with the achievements of any other power.

## Kept Busy

Visitor (at a very quiet seaplace). And whatever do you people do with yourselves in the winter? Landlady.—Oh, we talk and laugh about the people what stays 'ere in the summer.—Punch (London).

Willie.—Mother, is the pen mightier than the sword? Mother.—Of course it is. Your father couldn't sign checks with a sword.

## No Income Tax Paid By Kaiser

Wealth So Great It Cannot Be Fully Estimated

The German princes, proud and wealthy relics of royalty, are in more straits, and some of them are making persistent appeals for public aid. Oskar of Prussia and Rupert of Bavaria are imploring the German Governments to pension them as former Generals of the Imperial army, while the Duke of Saxe-Meiningen wants to return to well-paid duty as Inspector-General.

As for Wilhelm Hohenzollern, formerly Kaiser, he contents himself with claiming the property belonging to him. In Berlin and the suburbs he claims fifty-three palaces or other residences. Many houses in Berlin are mortgaged to him; he has properties all over Germany, and his wealth is so great that the Prussian Minister of Finance, who is in charge of auditing his accounts with the Government, declares himself incapable of estimating it fully.

And the Kaiser does not pay a cent of tax on his income.

## A Revolution In Electric Cooking

New Invention Uses Alternating Current To Generate Heat

The first electric cooking and heating apparatus ever constructed was made in Great Britain, and of late years several highly successful forms of electric cooking range have been put on the market by British firms. Recently there was announced an improvement which constitutes, it is claimed, a revolution in electric cooking. The exact nature of the new invention has not yet been disclosed, but it is understood to be a method of using alternating current so as to concentrate an extremely high temperature on the work of boiling up liquids. The apparatus enables the user, by simply moving a handle, to get any degree of heat from a gentle simmer to a fierce heat which will boil up a pint of water in a minute. Further developments in this attractive innovation are being awaited with interest.

## English Oak Becoming Scarce

Like All Hard Woods Supply Is Rapidly Decreasing

A forestry expert warns us that in Britain the oak, in spite of all the traditional sentiment about it, is becoming scarce, like other hard woods. Probably this was inevitable. The more complete your command of metals, the less do you need those woods which approach nearest to the special qualities of metal; the woods you value now are those which, like fir, are most unlike iron. But the oak had a great career of its time when it pastured the swine of our early forefathers in the glades of an almost forest-covered England, before the Romans had brought in the beech to add its succulent mast to the native acorn, down to the times when it furnished the rafters of Shakespeare's house and the ribs of Nelson's Victory.—Manchester Guardian.

They were having a botany lesson, and the children were asked by their teacher if they knew what made the leaves turn red in the autumn.

Up popped one hand and only one. "Well, Johnny," asked the teacher. "Please, miss," replied Johnny. "They must be thinking how green they have been all the summer."

## CLIMBING OVER IT

## Saskatchewan May Become The Leading Clay Producing Area Of The Dominion

Ceramic experts predict that the province of Saskatchewan will become the leading clay-producing area of the Dominion because it has a greater variety of clays than any other province of Canada, and that with development Saskatchewan should, in the manufacture of pottery and clay products, attain first importance. These clays range all the way from the lower grades used in the manufacture of bricks and tiles to a kaolin which burns as white as, if not whiter than, the best British product. As soon as financial conditions warrant it, the provincial authorities are bent on taking steps for the development of these deposits, which will give Saskatchewan its rightful place in ceramic manufacture.

For some time it has been known that Saskatchewan possesses clays which give it a peculiarly distinctive place in Canadian industrial life. To promote a knowledge of these deposits and encourage their development a course of ceramics was included some time ago in the curriculum of Saskatchewan University and a ceramic engineer secured who had a wide experience not only in tuition but also in field work among clays and in designing and constructing plants for the manufacture of brick, tile and other clay products. This accomplished a definite step forward in rendering available for commercial enterprise some of the valuable and extensive clay deposits of the province.

The classes of clay found in Saskatchewan are fireclay, brick and tile clays and earthenware clays. The first occurs at Eastend, Headly, Wilfords and Claybank; the second at Bruno, Estevan, Arcola, Weyburn, Pilot Mound, Claybank, Shand, Broadview and Eastend; the third at Redlyn, Wilfords and Eastend. Fireclay is used generally and extensively on industrial furnaces, blast furnaces, basic open hearths, furnace linings, above slag line for flues, boiler settings, linings of stoves, household pottery such as crocks, jars, churns, and in the manufacture of building brick, paving brick, sewer pipe, drain tile, building tile, chimney lining, chimney tops, etc. Earthenware clays are used in the manufacture of crockery such as crocks, jars, churns, the porcelain ware, blocks for flooring, architectural terra cotta, etc.

Extensive work undertaken has definitely proved Saskatchewan clays to be the equal of deposits anywhere, justifying greater development and the establishment of pottery industries in the province. Exhaustive tests have been made with Eastend clay in the ceramic laboratories, New York, in making chinaware, porcelain, terra cotta, etc., and all were highly satisfactory. No plant for these wares has yet been established in Saskatchewan, and all chinaware and pottery of every description have to be imported. A total of 170 carloads of clay were shipped from Eastend to the United States in the last year, to be manufactured there into brick, tiles and pottery.

It is self-evident that opportunities exist in the province of Saskatchewan for entering upon the exploitation and commercial development of these valuable clay deposits, which are, for the main part, accessible to good transportation facilities and other industrial requirements. Canada's imports of clay and clay products in the fiscal year 1921 amounted in value to \$10,281,692, and in 1922 to \$4,733,365, whilst the Dominion's exports of these products were of the insignificant amount of \$323,989 in the former year and \$267,624 in the latter. In 1920 Western Canada alone used more than \$25,000,000 worth of clay products in addition to its share of \$4,000,000 of crockery imported into Canada. In the province of Saskatchewan the brick and tile buildings in excess of \$5,000,000 in value are erected each year, the material for which has to be imported, over the value of approximately \$300,000, which is the extent to which this province, with such valuable deposits, contributes in manufacture.

The present centres of the clay manufacturing industry in Canada are S.W. Ontario, St. John, New Brunswick, St. John, Quebec, Vancouver, and 1921 Medicine Hat, Alberta. The latter point depending entirely upon Saskatchewan deposits for its raw material. These five points are responsible for practically the entire Canadian output of clay products. The Medicine Hat industry, drawing its clay from Saskatchewan, has made such aggressive progress that it is now accounting for seventy-five per cent. of the Dominion output and going a long way towards supplying the premises with certain clay products. Saskatchewan, which contains very favorable locations for the establishment of clay manufacturing plants,

has as yet no clay industries. But the province is keenly alive to the situation and the opportunities that are waiting, and in its accurate survey of its many and various clay deposits, its exhaustive tests to determine the suitable qualities of all material, and through its university course preparing a future supply of trained ceramic experts, it is taking the way for the development of the clay industry on a scale the Dominion has not hitherto known and one which its valuable resources warrant and justify.

## First Corn Exhibit At Prince Albert

Prize Winners in Unique Event Are Announced

P. H. Auld, Deputy Minister of the Department of Agriculture, received the official report of the first corn show ever held in Saskatchewan. The event took place in Prince Albert, on October 15, and attracted exhibits from all over the northern portion of the province.

Judging was done by Professor Manley Champin, head of the Department of Field Husbandry, Saskatchewan College of Agriculture, Regina.

The grand championship went to Stephen Schied, Wakaw, who entered an outstanding exhibit of Yellow Flint, and the reserve championship was awarded to the Prince Albert Jail Farm for an exhibit of Red Dent.

The third best corn in the show was entered by Ford Bond, of St. Louis, Sask., an exhibit of Squaw Corn.

The complete list of prize winners follows:

W. H. Flint.—Mrs. J. Black, Willow Hill, first; Stephen Schied, Wakaw, second; Mrs. E. McLean, Paddockwood, third.

Yellow or Mixed Flint.—Stephen Schied, first; Thomas Bibby, Royal, second; Smith Brothers, Prince Albert, third.

Early Squaw.—Fred Bond, St. Louis, first; A. F. Danbury, Buckland, second.

Sweet Corn (yellow or white).—Mrs. E. H. Black, Paddockwood, first; Samuel McCloy, Prince Albert, second; H. J. Beeching, Bjorkdale, third.

Sheaf Fodder Corn.—Prince Albert Jail Farm, first; Jail Farm, second; W. R. Pollock, Prince Albert, third.

Pop Corn.—Mrs. E. E. McLean, Paddockwood, first; Mrs. J. Gages, Arthursville, second; R. F. Reid, Tisdale, third.

The committee which arranged for the exhibition met at Paddockwood, first; Thomas Bibby, Henry LeCock, G. C. McDonald, J. W. McFarland, W. D. Mitchell, T. J. Agnew, F. J. O'Leary, and W. O. McDougall.

## Know His Capacity

Scotsman Could Not Eat Equivalent of Card Losses

A Scotsman had been invited to a dinner party and late in the evening was discovered by the hostess in a room all by himself and looking the picture of misery.

"Indeed, I am sorry to hear that, Mr. McGregor, but the loss is not steady. Come into the buffet and have a drink. And we have some fine cold ham there."

"No, no," said McGregor, despairingly. "I can eat 30 shillings' worth of cold ham!"—Edinburgh Scotsman.

## Seventy-Three Years As a Fisherman

Marcus Hitchcock Has Notable Career On Lake Huron

Marcus Aurelius Hitchcock on Oct. 15, celebrated his 73rd birthday and the 73rd year of his notable career as fisherman on Lake Huron. He is "Old Man" as he is familiarly termed by those who choose to ignore his share in the family roll of fame, has never missed a season on the lake since he was nine years old; has saved 11 people from drowning; was a champion figure skater, and states that he will be on the ice again this winter.

But With a Difference Mrs. Crimmonbeak—"See how nicely that team of horses or along. Why can't man and wife trot along pleasantly together like that?"

Mr. Crimmonbeak—"Well, you see, there is only one tongue between those two horses."—Witness.

As a rule you can form a pretty accurate opinion of what your neighbors think of you by what they say of others.

## GIFTS THAT LAST

WE WISH TO DRAW THE ATTENTION OF OUR PATRONS AND THE PUBLIC TO OUR VERY LARGE AND WELL-ASSORTED STOCK OF JEWELRY GOODS SUITABLE FOR CHRISTMAS GIFTS. SPACE HERE WILL ONLY PERMIT US QUOTING A FEW, BUT WE INVITE YOU TO OUR STORE TO MAKE YOUR SELECTION WHILE SELECTING IS GOOD.

**LARGE ASSORTMENT OF TIE PINS**  
Genuine Material—  
Prices 75c to \$55.00.

**WATCHES**—Very Latest Waltham Colonial Design, \$15.00 up to \$100.00. Also cheaper lines.

**WATCH CHAINS**—From \$27. up to \$61.

### DELTAH PEARLS

Finest Selection on the Market, with double silk string and 14-k white gold clasps.

ECLIPSE "NEVER-DULL" PENCILS  
GENTS' WRIST WATCHES, from \$10 up.  
LADIES' WRIST WATCHES, \$9 to \$95.  
LARGE ASSORTMENT OF CLOCKS.

A VERY SPECIAL IN 8-DAY MAHOAGANY CASE GILBERT DESK CLOCK FOR \$7.50.

A Beautiful Four-Piece Queen Anne Silver Set to be given away FREE  
Coffee Pot, Tea Pot, Sugar and Cream—Value \$95.  
Watch for Announcement

WE HAVE OTHER LINES TOO NUMEROUS TO MENTION HERE, BUT CALL IN AND LOOK OVER OUR IMMENSE AND ATTRACTIVE STOCK. NO NEED OF GOING OUT OF TOWN. WE HAVE YOUR REQUIREMENTS.

## S. TRONO WATCHMAKER & JEWELER BLAIRMORE

### NATIONAL POPPY DAY

Saturday, November 11th, the day known throughout the allied countries as Armistice Day, is to be fittingly observed in Alberta and other provinces of Canada by each and every person wearing a poppy, similar to those which grow in Flanders Fields. Due to the efforts of the Great War Veterans Association in this province almost every district in Alberta has been organized for the campaign and a large supply of the "flower of remembrance" has been secured.

Altogether 170,000 bright red poppies of two sizes and a large number of wreaths and sprays, the latter to be used in decorating monuments and tablets, have been distributed to the branches of the G. W. V. A. in the province and to other organizations handling the campaign. These are being sold during the few days previous to Armistice Day and also on that day and it citizens of this province remember the heroic deeds of the men who went over there, many of whom never returned, and there can be no doubt but that they do, it is evident that 170,000 persons will be wearing a poppy on that day.

The objects of the poppy day campaign are worthy of the support of every citizen. The flowers have been made by disabled Canadian veterans in hospital. The entire proceeds realized from the sale of the poppies in any district will remain in that locality to relieve distress among returned men, their dependents, widows and orphans during the coming winter.

It has been stated that Canadians will never forget the deeds performed by the men who fought in the Great War. The following is the last verse of a poem "The Aftermath" written by John Oliver Lewis which stands out among the many expressive contributions to Armistice Day:

They sleep, where they fell, at their duty  
And so there's a just God above,  
He'll open His arms to receive them,  
And bless them with infinite love,  
And we who remain—must remember

We're pledged for the rest of our lives,  
To care for the widows and orphans,  
Of these men who gave us their lives.

### HILLCREST HAPPENINGS

(By Our Own Dear Felix)

People are asking why it is that the Bellevue picture house can have an orchestra, whilst the patrons at Hillcrest have to sit at every show and listen to the same old tune grating from a player-piano. Come on, Bill, lots of budding musicians in town!

Frank Lote has been appointed projection officer for Hillcrest, so the curfew rings now at 9 p.m.

Fred Hriehorev has opened up a grocery store in Peaceful Valley, which ought to be a boon to that part of Hillcrest, especially in the winter time.

A special meeting of the Knights of Pythias took place at the schoolhouse on Tuesday night, October 31st, for the purpose of conferring degrees. The new lodge, since its institution, has made splendid progress.

It was with regret that the news reached town on Saturday last that R. Hackman, late driver boss here, had been killed whilst at work at No. 6, Lethbridge. No details are at hand as to how the accident happened.

Quite a large number of Hillcrest folks took in the dance given by the Bellevue band at the Bellevue I.O.O.F. hall on Thanksgiving night.

Don't forget the big masquerade dance at the Union hall on Friday night of this week. Come and have a real good time.

All the Tuxis Boys, Trail Rangers and Eureka were out in full force at the conclave held at Blairmore on November the 1st, Hillcrest taking their full share of the prizes. And their full share of the bean supper, all did justice to the bean supper. Our old friend, Ed. Boyle, acted as one of the judges at the conclave, and

feels overjoyed that one of the Hillcrest teams should attain the possible maximum of marks.

The vote of the miners on Monday resulted in the election of Dr. Rose, of Taber, to succeed Dr. H. A. McDonald as camp doctor.

W. Robinson has moved into his new residence in Peaceful Valley.

### COWLEY HAPPENINGS

Several Cowleyites attended the whist drive at Lundbreck on Wednesday evening last.

Mrs. R. B. Harrison, teacher of Olin Creek school, spent the week end in town.

A very enjoyable evening was spent at a party given by Mrs. James Leigh on Friday last for the golf players. The first prizes were won by Mrs. Robert Littleton and Wal. Eddy. Ed. Grove and Jack Robinson were awarded the booby prizes. A very dainty supper was served by the hostess. Twenty dollars was cleared.

Miss Smith was taken ill with appendicitis on Monday and was taken to Lethbridge on the noon train for an operation. Mr. and Mrs. Cowan accompanied her. We wish her a speedy recovery.

Miss Nellie McWilliams, school principal here, spent the week end with her parents at Lundbreck.

Mrs. Swart and children are spending a few days visiting relatives in Lethbridge.

Miss Bernice Anderson, teacher of the junior room of the Cowley school, left for Parkland on Thursday night's train to spend the Thanksgiving holidays with her parents.

James Leigh was a Thursday business visitor to Calgary.

Miss Gladys Baines spent Thanksgiving in Lethbridge.

Mr. Davis, of the Union Bank staff, was a Thanksgiving visitor to Macleod.

On Thanksgiving Day a number of

### CANADA'S BIGGEST THINGS

Fifty-five years old as a nation, Canada can boast many resources and achievements that are the largest in the world.

With 200,000,000 acres of arable land in the western provinces untouched by the plow and awaiting settlement, Canada, as a government bulletin points out, has the largest reserve of virgin agricultural land in the world. Yet she has already taken rank as the second wheat producing nation with a yield of 200,558,100 bushels in 1921.

With but half of 1 per cent of the world's population, Canada produces 90 per cent of the world's cobalt, 88 per cent of its asbestos, 55 per cent of its nickel, 12 per cent of its silver and 4 per cent of its gold. It contains 17 per cent of the coal deposits of the globe and 71 per cent of the coal reserve of the British empire.

Canada has the highest ratio of railway mileage to population of any nation; the largest grain elevator at Port Arthur with a capacity of 10,000,000 bushels; the largest grain conveying system at Montreal, the highest hydraulic lift-lock at Peterborough; the largest traction dredge at St. John's the largest water-power tunnel at Niagara Falls; the largest pulp mill at Chicoutimi, P.Q.; the largest paper machine at Iroquois Falls.

It has the largest grain farm in the Noble farms in Alberta, which in 1920 yielded 515,000 bushels of wheat, oats and rye; and the largest purebred horse ranch in George Lane's Percheron breeding farm in Alberta.

It has the largest copper mine in the British Empire in the Britannia in British Columbia; the largest nickel mine in the world in the Creighton of the Sudbury district, producing more than one-half of the world's output of that metal; the largest game preserve in Jasper Park in Alberta, containing 4,400 square miles and sheltering 10,000 mountain sheep alone.

With South Africa mines in only partial operation, Canada will have the greatest gold producing mine in 1922 in the Hollinger of Northern Ontario—Chicago American.

### OUR OPINION

So far as The Times is concerned, we are frankly of the opinion that the present Liquor Act is not working satisfactorily in this province, and this opinion we believe is shared by numerous people throughout it. In 1916 the people voted for government vendicorp of liquor and the elimination of the bar and won by a large majority, and we believe that a great mistake was made by prohibitionists when they rushed through further legislation, with a view to forcing on the people bone dry conditions. It was after the taking of the plebiscite that bootlegging became prevalent, and this explains why there is so much difficulty in enforcing the law against offenders of the Liquor Act. The majority of the people, seemingly, are not in sympathy with the Act which was forced upon them and, as a result they are indifferent as to its functioning. Take the experiences of the average magistrate or justice of the peace, and they will say that, invariably the person accused of an infraction of the Liquor Act has the sympathy of a large portion of the people, which explains the great difficulty our policemen have in the observance of the Act. Our candid opinion is that a fair trial should have been given the original Act, and by process of education, which takes time, our people of Alberta would approve or disapprove of that act if they considered it was for the betterment of all—High River Times.

Cowley citizens attended the turkey shoot and dance at Fincher Creek. The weather was ideal.

The turkey shoot at Fink's ranch was not very well attended and less than one tenth of the 500 turkeys were disposed of. Owing to protests about gun sights, which were not barred in the advertisements, there was dissatisfaction.

### SEARCHING FOR MEN

WITH TAILS

Reports that a tribe of people, who have tails, is living in Indo-China, have brought Capt. E. A. Salisbury, world famous explorer, scientist, and author, to the Far East. He will leave Japan shortly for northern China and then he will explore inland with the intention of finding the newly-reported breed of men which is puzzling European anthropologists. Captain Salisbury is the first man to attempt a systematic search and the result of his investigation is being eagerly awaited. Captain Salisbury will go from Indo-China to Europe and by way of the Suez Canal. He will tour Abyssinia on the way and has been invited to be the guest of the King of Abyssinia.

The hockey boys have been undergoing some strenuous work at the arena gymnasium for the past few weeks. They have the use of the gymnasium on Tuesday and Thursday evenings and Sunday mornings.

### NEW PALM CAFE

OFFICIALLY OPENED

The new Palm Cafe was opened officially on Saturday, when patrons to the number of about 150 were each presented with a beautiful carnation. On Sunday evening, the special Thanksgiving dinner proved quite an attraction. Dinner was served to upwards of one hundred guests, while splendid music was furnished by the Big 4 Orchestra.

Since opening, business has been exceptionally brisk, and with the coming on of the skating and hockey season, the Palm bids fair to command a full portion of the restaurant business.

Lethbridge will not be satisfied with a \$15,000 arena and the rink committee have decided to get after an addition five thousand.

Miss McFarland, of Lethbridge, is spending a few days with Miss Beard.

# Election Campaign In Britain Gives Promise Of Becoming Bitter

London.—Premier Bonar Law is credited with becoming resentful of the personal attacks on his ministerial colleagues and with intending to hit back vigorously, basing his position on the ground that Lloyd George has been more or less rejected by all parties and is banking on personal popularity.

In a letter addressed to the British Legion of Former Service Men, the Prime Minister explains his attitude with regard to the pensions ministry retreating against the interests of the pensioners. He explains that the ministry cannot be abolished except by legislation, and that the new ministry of pensions will not be removed until the House of Commons has had the fullest opportunity to discuss the pensions matter, at which time the views of the former service men will receive every consideration.

Election oratory is again in full flood, and is notable for bitter personalities, especially between the supporters of Lloyd George and those of Sir George Younger. Lord Birkhead declared in a speech that it is Younger's hope to leave Lloyd George marooned and helpless in the new Parliament.

New candidates are being nominated daily and there are nearly 1,000

nominations. A striking feature is the large number of professional men standing under the Labor banner.

## Roman Premier

### Sends Greetings

Address Sent to Bonar Law Conveying Assurance of Solidarity Among Allied Nations

Rome.—Benito Mussolini has sent a message to the British Prime Minister, Mr. Bonar Law, and the French Premier, M. Poincaré, announcing his accession to the premiership as "the representative of Italian ideals born at Vittoria Veneto." The message conveys cordial greetings and assurance of solidarity among the allied nations, which, Mussolini adds, "I regard as indispensable for the effectiveness of their political action."

A communique issued by the commander of the Roman Legion announces that, by Premier Mussolini's instruction, any action taken by the Fascisti, either collectively or individually, which is directed against Communists or persons presumed to be Communists, will be repressed with the utmost severity, and the responsible leaders prosecuted and punished in an exemplary manner.

## Paints Gloomy Picture

Hard Winter Fearing Germany in Opinion of Chancellor Wirth. Berlin.—Chancellor Wirth received members of the repatriations commission and in welcoming them, expressed special pleasure at seeing M. Barthou as the new chairman.

Dr. Wirth declared that the country was confronted with a winter of starvation and cold, as there was a shortage of food and fuel. Stabilization of the mark, in his opinion, was the first problem requiring solution. Only speedy action, he said, could save the situation and Germany's productive capacity.

### Thornton Will Sail Soon

London.—Sir Henry Thornton, the new President of the Canadian National Railways, will sail on the Olympic on November 23 and will take up his new duties as head of the National Lines in Canada immediately upon his arrival in the Dominion.

## Extend Closing Date For Landmark Design

Contest Will Remain Open Until November 15

Ottawa.—Authority has been granted to extend the closing date of the competition for designs for landmarks on historical sites from October 31 to November 15.

This competition, which was organized by the Department of the Interior among the art schools and architects of the Dominion, is for the purpose of securing a design for a suitable standard to which will be affixed the bronze tablet intended to mark the historic sites of the Dominion which are judged by the Historic Sites and Monuments Board of Canada to be of national importance and worthy of preservation and commemoration.

Five hundred dollars has been awarded for the competition as follows: First prize, \$250; second prize, \$150; third prize, \$100.

## All Records Broken By Montreal Customs

Receipts For October 30 Totalled Over One Million

Montreal.—Local customs and excise receipts for October totalled \$8,452,171, and represented one of the biggest months' business in the history of the port of Montreal. For the first time on record receipts in one day—those for Oct. 30—exceeded a million dollars, the actual figure being \$1,029,312.70.

Announcement is made that nearly eighteen millions more bushels of grain reached Montreal before the end of October this season than during the same period last year, the total to date being 72,801,390 bushels for 1922 as compared with 60,654,722 bushels for 1921.

## No Reciprocity Treaty

U.S. Senator Does Not Expect Reciprocity Pact With Dominion

Washington.—No reciprocity treaty with Canada is likely to be brought about, according to Senator McCumber, chairman of the Senate Finance Committee. He points out that the tariff act makes no provision for reciprocity, and that a special treaty would be needed. He doubts whether this could be arranged or ratified by the Senate.

Senator McCumber does not believe the tariff law will seriously cut down importation, and predicts it will not seriously divert Canadian trade from the United States.

Alsace-Lorraine After Self-Government Kolmar, Alsace.—Autonomy and neutrality for Alsace-Lorraine is the moving spirit behind preparations which are being made for an international conference to be held here this fall. Friends of the movement are to be invited also from Switzerland, England, Denmark, Italy, Sweden, Norway, Holland, Spain, America, and other countries.

Floating Mines Still a Menace Stockholm.—All ships leaving ports on the Baltic Sea have been warned of the renewed danger of mines, many of which have been found in various parts of the sea during the last month.

The sea was reported to be mine free after German boats had been sent to clear the waters last summer. It is now alleged that this job was not well done, and that there is still much danger from these floating derelicts.

Two Killed in Airplane Collision Honolulu.—Lt. V. Hynes and Sgt. Ross, of the Sixth United States Pursuit Squadron, Lukefield, were killed and Captain T. W. Allen and Lieut. A. F. Hubbard, Schofield Barracks, were injured, when two army airplanes collided.

# Premier Bonar Law Announces Personnel Of His New Cabinet

London.—Premier Bonar Law has issued the first of the remaining officers of his Government, in which there is again a fair infusion of members of the House of Lords. His appointment of a minister of pensions does not necessarily mean that he has yielded to the Laborite clamor against the proposed abolition of that ministry, but is considered more likely a merely formal appointment in order to carry on the work until the ministry can be abolished by legislation. Legislation against abolition of the pensions ministry, however, is gaining ground.

Sir Montagu Barlow, who was par-

A. H. Liveridge, Editor and Proprietor of The Free Press, Wetaskiwin, Alberta.

## U.F.A. Membership Declines

Drops From 38,000 to 15,000 in Year

Calgary.—United Farmers of Alberta membership has decreased from 38,000 on September 30, 1921, to 15,000 on September 30, 1922, according to official figures contained in "The U.F.A." official journal of that organization. The enormously decreased membership and consequent falling off in revenue were matters of serious consideration at the recent executive meeting held here. "No effort is made to explain the decrease in membership, but the journal says a policy of strictest retrenchment must be undertaken right away. One of the economies decided upon was the elimination of all organization work, other than of a voluntary nature, for an indefinite period."

### Freight Rate Exchange

Ottawa.—It is announced by the Board of Railway Commissioners for Canada that the rate of exchange in connection with shipments of freight from Canada and the United States from November 1 to November 14 inclusive will be one-eighth of one per cent. No surcharge will be collected on international freight or passenger business.

### Ypres Plans to Build Hostel

London.—The anniversary of the first battle of Ypres was commemorated in London by the sale of corn flowers on the streets in aid of the Ypres League, which has decided to establish a permanent hostelry in Ypres for the poorer people who journey there to visit the graves of their dead.

Tornado Demolishes Thirty Houses Webb City, Mo.—One woman was killed, 10 other persons were injured, several seriously, and about thirty houses were demolished by a tornado which struck this city. One hundred persons were made homeless. Four persons were accounted for and it was thought they were killed and buried under debris.

### Huge Ore Shipments

Superior, Wis.—Ten million tons of ore, the largest tonnage shipped during Superior since the period of depression following the war, has been sent down the lakes from the three or four docks here this season, it is announced.

### Shortage of Rain at Coast

Vancouver.—The close of a fairly wet October finds Vancouver still 13 inches of rain short of its annual average rainfall as of October 31.

### Ships Founder in Stern

San Salvador, Republic of Salvador.—Several vessels have foundered in a gale along the Pacific coast.

# Sir Auckland Geddes Advises Canadians To Stay In Dominion

St. Catharines, Ont.—Young Canadians should stay in their own country, Sir Auckland Geddes, British Ambassador to the United States advised students of Ridley College in an address delivered in the course of a visit to his son who attends the university.

"At the present time in the world," he declared, "there is a great difficulty in all countries in keeping all sections of the people prosperous. This difficulty is less marked in Canada than in any other British Dominion and less throughout the Empire than in the rest of the world. You young men have got to bring the world back," said Sir Auckland, after a reference to the destruction wrought by the war.

He asked the student body: "Are

you going to follow the spirit of the men who fought and laid down their lives in the war, or are you going off somewhere else?"

They were the children of a great race and the children of a great community, with duties to all members of that community. He hoped the future would not show the young men of Canada leaving their native land when there was so much restoration and development work to be done. The real responsibility of the future rested on Ridley and other schools of the Dominion for this respect.

Violent Deaths In Toronto Toronto.—Violent deaths in Toronto for October reached the high mark of 36, an unusual record.

## Try these Bakers' Raisin Pies —save baking at home

THERE are luscious raisin pies just around the corner, at your grocer's or a bake shop.

Baked to a turn—a flaky crust filled with tender, tempting raisins, the rich juice forming a delicious sauce.

Once try these pies that master bakers bake fresh daily in your city and you'll never take the trouble afterwards to make raisin pies at home.

Get a pie now and let your men folks taste it. Made with tender, thin-skinned, meaty, seeded Sun-Maid Raisins.

Raisins furnish 1560 calories of energizing nutriment per pound in practically predigested form.

Also a fine content of food-iron—good food for the blood. The raisins frequently, therefore, which are both good and good for you, in puddings, cakes, cookies, etc.

You may be offered other brands that you know less well than Sun-Maid's, but the kind you want is the kind you know is good. Insist, therefore, on Sun-Maid brand. They cost no more than ordinary raisins.

Mail coupon for free book of tested Sun-Maid recipes. Learn what you can do with luscious raisins.

## Local and General Items

For funeral flowers phone 212, Crown's Nest Funerals Undertaking Co.

Miss H. Gervai spent Thanksgiving at her home in Medicine Hat.

Dr. R. K. Lillie motored to Calgary and return last week end.

George Skelding was up from Macleod last week end renewing old acquaintances.

Mr. and Mrs. Joseph Bond spent Thanksgiving here with the former's parents.

Greatness is not measured by physical or financial powers, but by the service we are rendering to our fellow man.

The more a man's head gets to look like an egg, the more responsive he becomes to the influences of a "chicken."

Misses C. and A. Marquis spent Thanksgiving at their home in Pincher Creek, returning to town on Tuesday morning.

A special train on the Canadian National railway, bearing three hundred settlers for the west, reached Winnipeg last week.

A report from Ottawa states that a special force of customs officers are being established along the international boundary line to stop smuggling.

Mr. H. Matheson, recently captured between Crow's Nest and Lethbridge with a load of booze, was a visitor to the Frank barracks of the A. P. P. last week.

Premier Greenfield will leave his week to attend the conference on the return of the natural resources to the western provinces, to be held at Ottawa on November the 14th.

The band of the Edmonton Great War Veterans Association, numbering thirty-five pieces, will leave on November 28 on a special tour of the United States, having contracts to play in 143 towns and cities.

Alberta has become popular as a place for the establishment of silver fox farms. The latest south west of Calgary, and a consignment of 130 pairs of foxes, valued at \$250,000, reached the farm last week from New Brunswick.

Rev. F. S. McCall, of Alberta College, North Edmonton, is a big man usually with a big appetite. The latest report says that he has "taken in" the Carden temple. He probably still remembers the old hint to "Bite bigger, Billy, bigger yet."

"Good Roads" is the name of a new monthly publication which made its appearance in Edmonton in August. The paper is the official organ of the Edmonton Automobile and Good Roads Association, and is published by the Metropolitan Printing Co., Limited.

Farmers along the new United Irrigation project, near Cardston, are now using the water in the project for fall irrigation. The new project, built under provincial government guarantee of bonds, irrigates 17,000 acres southwest of Lethbridge near Cardston.

Township 143, the farthest north township in Canada, has been established. Taking up the marking of the sixth meridian, the Dominion topographical expedition produced the line straight north for one hundred miles, reaching and extending across the Mackenzie River one mile and two miles past the boundary of Alberta. There is a settlement in the entire district surveyed.

Miss Pearl Madden is in town today from Lundbreck.

By avoiding their first quarrel a married couple will never have a second.

Miss Doris Knapman returned yesterday from a two weeks' visit to Lethbridge.

A fine buck deer fell to our lot on Monday, just in time for the Thanksgiving dinner.

Too many reformers righting the world's wrongs are really wronging the world's rights.

A grand masquerade dance will be held in the Union hall at Hillcrest tomorrow (Friday) night.

The annual dance of the Lundbreck Golf Club will be held at Tustian's hall, Cowley, on Friday night of next week.

Miss Wilson, of Triton-Wood's office, Michel, was the guest of Mr. and Mrs. D. Fleming during the Thanksgiving holiday.

Our paper is coming out four minutes earlier this week to congratulate Manager Wilson, of the Union Bank, on the arrival of a son to Mrs. Wilson.

A large number of young people availed themselves of the good sheet of ice near McLaren's mill the early part of the week. Skating is being kept up every evening.

The overturning of a roadster on the Edmonton-Calgary highway on Tuesday resulted in the death of Dr. O. Eastman, prominent physician of Calgary. Two ladies were seriously injured and are in hospital.

Ex-Sergt. Maylor, of the R.C.M.P., spent a day or two in town this week, meeting his old friends. Mr. Maylor is one of several veterans of the force recently retired on the pension list. He now resides at Lethbridge.

Laurence McDuff and Horace Negus, who started from Amherst, N.S., to each roll a barrel to Vancouver, B.C., a distance of about 4870 miles, have passed through Toronto, having been about seventy-five days on the journey. They push or pull the barrels by means of long handles. Their trip time is limited to eight months.

A number of boys at Okotoks were caused to appear before a magistrate and make good the damage done on Halloween night. It's a very easy matter to have lots of fun on Halloween without causing wanton destruction of property and its most always the bigger boys (or young men) who do the most damage and display less regard for the law.

Some statisticians have figured out that it would require 257,250 freight cars and 7,350 locomotives to move Canada's grain crops this year, and that if placed in a continuous string there cars and engines would make a train 2060 miles long, or almost the distance from Montreal to Medicine Hat. Canada's wheat crop this year is large enough to supply 25,000,000 people with a loaf of bread per day for a whole year.

Mr. Trudel, of the Trudel Fur Manufacturing Co., Edmonton and Lethbridge, conducted a display of furs, fur coats, etc., at the store of The Pass Clothing Co. on Friday and Saturday last. So pleased was Mr. Trudel with the results and with the town in general that he has decided to locate here permanently in the very near future and in all probability will buy a lot and erect a new store which would be the distributing centre for the district of Macleod to Cranbrook.

Miss Pidgeon, of Pincher Creek spent last week end in town. Mr. and Mrs. H. W. Scott and children spent this week in Calgary.

Born, on Monday, November 6, to Mr. and Mrs. D. Rees, a son.

Mr. H. H. Griesbach has returned to his post in the customs house, after his annual two weeks' vacation.

Mr. and Mrs. S. Simister have moved from State Street and now occupy one of the company cottages in West Blairmore.

Mr. Griffin, representing the Fire Insurance underwriters, is looking over fire risks in the town this week.

Miss Mary MacSwiney, sister of the late mayor of Cork, Ireland, MacSwiney, has been arrested in Dublin, and has threatened to undertake a hunger strike.

Ex-Inspector J. A. McDonald of the R. C. M. P., stationed at Macleod for a number of years, but now retired on pension, together with Mrs. McDonald, are residing at Vancouver.

The regular fortnightly meeting of the Blairmore town council will be held on Monday night next, at which applications for the position of chief of police will be given consideration.

The former German emperor, once all highest of the German empire, and Princess Hermine of Reuss, were married Sunday last at the house of Doorn, where the lord abides in exile.

We understand that the capture of a working still and a quantity of mesh and manufactured spirits was effected by Constable Moriarty near Bellevue on Tuesday this week.

Six young girls at the Belmont Home, a Toronto place of detention and reform, who lobbied their hair, were arrested on Friday last and awarded six months sentence for inebriation.

Long Wing, a Chinaman of Foremost, is being tried for bribery. He is accused of offering to bribe an A. P. P. officer to prevent his being prosecuted under the Alberta Liquor Act.

Hon. Alex. Ross, minister of public works, and W. C. Ryan, police commissioner, will be in town on Saturday to look over the site proposed for the new court house.

It is said that police records at Lethbridge show that more cases of drunkenness and crime have come up before the courts during the month of October than in any similar period prior to the introduction of the Alberta Liquor Act.

On the corner of a block in Philadelphia there is a restaurant with the flaming sign: "Never Closed." On the other corner a drug store displays its motto: "Open all night." Between the two Wu Ting Lung has a modest laundry. Not to be outdone by the Yankees, he has hung out an electric sign that can be read for a block or more. It reads: "Me Wokee, Too!"

Two central Alberta editors are rejoicing over the fact that they safely returned from a visit to British Columbia without ever dropping their luggage or having the contents smashed. They both claim that they could turn out a far better paper, more interesting to the majority of their readers, if they could reside on the B. C. side and operate their plants by some long-distance method. We wish Sam and Charlie every success.

A man walked into the local drug store the other day and asked for some "Concocted lye." The druggist—"You mean concentrated lye?"

Man—"It does nothing any difference. That's what I camphor. What's it sulphur?"

Druggist—"Fifteen cents. I never cinnamon with so much will!"

Man—"Well, I should myrrh myrrh. Yet I ammonia novice at it!"

EARL NEWCOMBE  
Minister of Finance of the Older Boys' Provincial Parliament, who is heading the Boys Share Selling Campaign.

### TURKEY AND ITS CUSTOMS

Turkish baths are unknown in Turkey.

In area Turkey is not as large as British Columbia.

The present Sultan is the 37th in male descent from Osman.

Friday is the day observed by the Turks as their Sabbath.

The Sultan receives the largest income paid to an earthly sovereign.

Turkey has 26 official holidays in the year, when business is suspended. One may not send photographs and the like to Turkey, for to the Muslim the picture of any person signifies a curse.

Dictionaries are also forbidden entrance to Turkey because the Sultan is usually mentioned in such books, and that is contrary to Turkish law.

In Turkey, the moment the roof is built over a new house it is customary to hang from the most prominent eave a string of garlic with an old shoe to keep off the evil eye.

In Constantinople it is impossible to communicate with any one by mail. Instead, it is necessary to send a servant with the message or go oneself to make the communication in person.

The laws of the Turkish empire are based on the precept of the Koran, and the Sultan's will is absolute when not in opposition to accepted truths of the Mohammedan religion as laid down in the sacred books of the prophet.

Turkey's principal products are tobacco, cereals of all kinds, cotton, figs, nuts, almonds, grapes, olives, and all varieties of fruit. Coffee, madder and opium and gums are largely exported. The fisheries are also an important industry.

Constantinople, chief city of the Turkish empire, was originally the ancient city of Byzantium. In 330 B.C., the Emperor Constantine made it the capital of the Roman empire, and called it after his own name. The city lies on an arm of the sea called the Golden Horn, and is protected by a great wall built by the Byzantine emperors.

In the Green Vaults of the Porte lies hidden away what is perhaps the greatest treasure in the world, collected for centuries, by Turkey's greedy rulers and hoarded away from the gaze of any inquisitive mortal. No one has ever been able to estimate the value of the Sultan's jewels for the treasures are guarded day and night. There are at least twelve sets of heavily-barred doors to pass before the actual entrance to the vaults is reached. For every lock there are two keys, entrusted to as many custodians, each having twenty-four guards. These are supposed to spy on each other as well as to protect the guardians of the keys.

Hallow's night at Aetna has produced what may result in a serious affair. Wm. Bates is out on \$1,500 bail and remanded for trial, while Matty Taylor, Doris Skriver and a Paul girl, are all lying in the hospital threatened with blood poison from 21 pellets from a shotgun in the hands of Bates. The girls were returning from a Hallow's party and Bates who was lying in wait, opened fire with the above results. Bates was arrested next day by Const. Marjorison on a charge of shooting with intent to do serious bodily harm.
